Preface

This Operation Guide is intended to help you operate the machine correctly, perform routine maintenance and take a simple troubleshooting action as necessary, so that you can always use the machine in good condition.

Please read the Operation Guide before using the facsimile. Keep it close to the facsimile for easy reference.

About the FAX Operation Guide (this Guide)

Structure of the guide

This Operation Guide contains the following chapters.

<table>
<thead>
<tr>
<th>Chapter</th>
<th>Contents</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Legal and Safety Information</td>
</tr>
<tr>
<td>2</td>
<td>Before Using the Fax Machine</td>

Conventions Used in This Guide

Adobe Reader X is used as an example in the explanations below.

Click an item in the Table of Contents to jump to the corresponding page.

NOTE
The items that appear in Adobe Reader vary depending on how it is used. If the Table of Contents or tools do not appear, refer to Adobe Reader Help.

Certain items are indicated in this guide by the conventions described below.

<table>
<thead>
<tr>
<th>Convention</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[Bold]</td>
<td>Indicates keys and buttons.</td>
</tr>
<tr>
<td>&quot;Regular&quot;</td>
<td>Indicates a message or setting.</td>
</tr>
</tbody>
</table>
Conventions used in procedures for operating the machine

In this Operation Guide, continuous operation of the keys on the touch panel is as follows:

<table>
<thead>
<tr>
<th>Actual procedure</th>
<th>Procedure indicated in this guide</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select the [System Menu/Counter] key. ▼</td>
<td>[System Menu/Counter] key &gt; [Common Settings] &gt; [Sound]</td>
</tr>
<tr>
<td>Select [✓]. ▼</td>
<td></td>
</tr>
<tr>
<td>Select [Common Settings]. ▼</td>
<td></td>
</tr>
<tr>
<td>Select [Sound].</td>
<td></td>
</tr>
</tbody>
</table>

Select [Next] of "Job Accounting Settings".

Select [Change] of "Job Accounting".

Select [Change] of "Job Accounting (Local): Apply Limit":
# Size and Orientation of Originals and Paper

Original sizes and paper sizes such as A4, B5, and Letter can be used in both the horizontal and vertical orientations. To distinguish the orientations when these sizes are used, "R" is added to sizes used in the horizontal orientation. In addition, the following icons are used to indicate original and paper placement orientations on the touch panel.

<table>
<thead>
<tr>
<th>Orientation</th>
<th>Setting Position (X=Length, Y=Width)</th>
<th>Icons on the touch panel</th>
<th>Indicated size in this Guide*1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vertical orientation</td>
<td>Original</td>
<td>![Original Icon]</td>
<td>A4, B5, Letter .etc</td>
</tr>
<tr>
<td></td>
<td>Paper</td>
<td>![Paper Icon]</td>
<td></td>
</tr>
<tr>
<td>Horizontal orientation</td>
<td>Original</td>
<td>![Original Icon]</td>
<td>A4-R, B5-R, Letter-R .etc</td>
</tr>
<tr>
<td>(-R)</td>
<td>Paper</td>
<td>![Paper Icon]</td>
<td></td>
</tr>
</tbody>
</table>

*1 Original/paper sizes that can be used vary depending on the function and source tray. For details, refer to the following.

➤ Machine’s Operation Guide
Please read this information before using your machine. This chapter provides information on the following topics.

Notice

Safety Conventions in This Guide

The sections of this handbook and parts of the facsimile marked with symbols are safety warnings meant to protect the user, other individuals and surrounding objects, and ensure correct and safe usage of the facsimile.

**WARNING**: Indicates that serious injury or even death may result from insufficient attention to or incorrect compliance with the related points.

**CAUTION**: Indicates that personal injury or mechanical damage may result from insufficient attention to or incorrect compliance with the related points.

Symbols

The △ symbol indicates that the related section includes safety warnings. Specific points of attention are indicated inside the symbol.

- △ ... [General warning]
- △ ... [Warning of high temperature]

The ◦ symbol indicates that the related section includes information on prohibited actions. Specifics of the prohibited action are indicated inside the symbol.

- ◦ ... [Warning of prohibited action]
- ◦ ... [Disassembly prohibited]

The ● symbol indicates that the related section includes information on actions which must be performed. Specifics of the required action are indicated inside the symbol.

- ● ... [Alert of required action]
- ● ... [Remove the power plug from the outlet]
- ● ... [Always connect the machine to an outlet with a ground connection]

Please contact your service representative to order a replacement if the safety warnings in this Operation Guide are illegible or if the guide itself is missing (fee required).

**NOTE**

Due to performance updating, information in this Operation Guide is subject to change without notice.
About this Operation Guide

This Operation Guide contains information on using the facsimile functions of this machine. Please read the Operation Guide before you start using the machine.

During use, refer to the Operation Guide for your machine for information regarding the sections listed below.

- Environment
- Precautions for Use
- Loading Paper
- Toner Container Replacement
- Replace the Waste Toner Box
- Cleaning
- Solving Malfunctions
- Responding to Messages
- Clearing Paper Jams

Legal Notice

WE SHALL HAVE NO LIABILITY FOR LOSS, WHETHER OR PARTIAL, OF RECEIVED DOCUMENTS WHEN SUCH LOSS IS CAUSED BY DAMAGES TO THE FAX SYSTEM, MALFUNCTIONS, MISUSE, OR EXTERNAL FACTORS SUCH AS POWER OUTAGES; OR FOR PURELY ECONOMIC LOSSES OR LOST PROFITS RESULTING FROM MISSED OPPORTUNITIES ATTRIBUTABLE TO MISSED CALLS OR RECORDED MESSAGES RESULTING THEREFROM.

FCC PART 68 REQUIREMENTS

1. This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the left or right side of the equipment to install Assembly Board is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

2. This equipment connects to the network via USOC RJ11C.

3. A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

4. The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

5. If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

6. The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.
7 If trouble is experienced with this equipment, please contact the following company for repair and (or) warranty information:

KYOCERA Document Solutions America, Inc.
225 Sand Road,
Fairfield, New Jersey 07004-0008, USA
Phone: +1-973-808-8444
Fax: +1-973-882-6000

If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

8 This equipment cannot be used on public coin service provided by the telephone company. Connection to Party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

9 If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

10 The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including FAX machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.)

In order to program this information into your FAX machine, you should complete the following steps: (Insure that it will be transmitted, see Local FAX Name(Port 1) on page 2-11, Local FAX Number(Port 1) on page 2-11, TTI on page 2-11 and Setting Date and Time on page 2-14.)

IMPORTANT SAFETY INSTRUCTIONS

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

CAUTION: To reduce the risk of fire, use only No.26 AWG or larger UL listed or CSA certified telecommunication line cord.

1 Do not use this product near water, for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement or near a swimming pool.

2 Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.

3 Do not use the telephone to report a gas leak in the vicinity of the leak.

4 Use only the power cord and batteries indicated in this manual. Do not dispose of batteries in a fire. They may explode. Check with local codes for possible special disposal instructions.

SAVE THESE INSTRUCTIONS

IMPORTANTES MESURES DE SECURITE

Certaines mesures de sécurité doivent être prises pendant l'utilisation de matériel téléphonique afin de réduire les risques d'incendie, de choc électrique et de blessures. En voici quelques unes:

1 Ne pas utiliser l'appareil près de l'eau, p. ex., près d'une baignoire, d'un lavabo, d'un évier de cuisine, d'un bac à laver, dans un sous-sol humide ou près d'une piscine.

2 Eviter d'utiliser le téléphone (sauf s'il s'agit d'un appareil sans fil) pendant un orage électrique. Ceci peut présenter un risque de choc électrique causé par la foudre.

3 Ne pas utiliser l'appareil téléphonique pour signaler une fuite de gaz s'il est situé près de la fuite.
4 Utiliser seulement le cordon d'alimentation et le type de piles indiqués dans ce manuel. Ne pas jeter les piles dans le feu: elles peuvent exploser. Se conformer aux règlements pertinents quant à l'élimination des piles.

CONSERVER CES INSTRUCTIONS

CANADIAN IC REQUIREMENTS

"This product meets the applicable Industry Canada technical specifications"

"The Ringer Equivalence Number is an indication of the maximum number of devices allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five."

The REN (CANADA) of this product is 0.4.

CONDITIONS DE L'IC CANADIENNE

"Le présent matériel est conforme aux spécifications techniques applicables d'Industrie Canada."

"L'indice d'équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de terminaux qui peuvent être raccordés à une interface téléphonique. La terminaison d'une interface peut consister en une combinaison quelconque de dispositifs, à la seule condition que la somme d'indices d'équivalence de la sonnerie de tous les dispositifs n'excède pas 5."

Le IES (CANADA) pour ce produit est 0.4.

Declarations to European Directives

DECLARATION OF CONFORMITY TO 1999/5/EC and 2009/125/EC

We declare under our sole responsibility that the product to which this declaration relates is in conformity with the following specifications.

<table>
<thead>
<tr>
<th>Terminal Equipment (TE);</th>
<th>TBR 21</th>
</tr>
</thead>
<tbody>
<tr>
<td>Attachment requirements for pan-European approval for connection to the analogue Public Switched Telephone Networks (PSTNs) of TE (excluding TE supporting the voice telephony service) in which network addressing, if provided, is by means of Dual Tone Multi Frequency (DTMF) signalling</td>
<td></td>
</tr>
</tbody>
</table>
Technical regulations for terminal equipment

This terminal equipment complies with:

- TBR21
- AN 01R00 AN for P
- AN 02R01 AN for CH and N
- AN 05R01 AN for D, E, GR, P and N
- AN 06R00 AN for D, GR and P
- AN 07R01 AN for D, E, P and N

- P 08R00 National AN for P

Network Compatibility Declaration

The manufacturer declares that the equipment has been designed to operate in the public switched telephone networks (PSTN) in the following countries:

- Austria
- Belgium
- Bulgaria
- Cyprus
- Czech
- Denmark
- Estonia
- Finland
- France
- Germany
- Greece
- Hungary
- Iceland
- Italy
- Latvia
- Liechtenstein
- Lithuania
- Luxembourg
- Malta
- Norway
- Portugal
- Romania
- Slovakia
- Slovenia
- Spain
- Sweden
- Switzerland
- The Netherlands
- United Kingdom

Trademark Information

- Adobe Acrobat and Adobe Reader are trademarks of Adobe Systems Incorporated.
- IBM and IBM PC/AT are trademarks of International Business Machines Corporation.

All other company and product names in this Operation Guide are trademarks or registered trademarks of their respective companies. The designations™ and ® are omitted in this guide.

Part Names and Functions

Machine

This chapter explains the names of parts when the machine is used as a fax machine. For the parts required when functions other than FAX are used, refer to the following:

- Machine’s Operation Guide

<table>
<thead>
<tr>
<th>No.</th>
<th>Part Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Operation panel</td>
<td>Perform the fax operation with this panel.</td>
</tr>
<tr>
<td>2</td>
<td>Power switch</td>
<td>Set this switch to the ON side when performing the fax or copier operation. The touch panel lights to enable operation.</td>
</tr>
<tr>
<td>3</td>
<td>MP (Multipurpose) tray</td>
<td>Set the paper in this tray when using a type of paper other than the cassette (e.g., when using special paper).</td>
</tr>
<tr>
<td>4</td>
<td>LINE connector (L2)</td>
<td>If you install 2 optional FAX Kits (Dual FAX option), you can use Port 2. Connect the modular cord for the telephone line to this connector.</td>
</tr>
<tr>
<td>5</td>
<td>LINE connector (L1)</td>
<td>Connect the modular cord for the telephone line to this connector. This connector is Port 1.</td>
</tr>
<tr>
<td>6</td>
<td>TEL connector (T1)</td>
<td>When using a commercially available telephone set, connect the modular cord to this connector.</td>
</tr>
</tbody>
</table>

**IMPORTANT**

You cannot automatically receive a fax when the power switch is turned off.
Document Processor (Option)

7 Top cover
Open this cover when the original jammed in the Document Processor.

8 Opening handle
Hold this handle when opening or closing the Document Processor.

9 Original eject table
Read originals are ejected onto this table.

10 Original table
Stack the sheet originals on this table.

11 Original width guides
Adjust these guides according to the original width.
Before Using the Fax Machine > Part Names and Functions

Operation Panel

1 [Home] key: Displays the Home screen.
2 [Numeric Keypad] key: Displays numeric keys on the touch panel.
3 Function Key: These keys enable various functions and applications, including copy and scan, to be registered.
   ➤ Function Key Assignment (page 8-8)
4 [Job Separator] indicator: Lights when there is paper in the job separator tray.
5 [Accessibility Display] key: Switches the touch panel display on the Copy screen and the Send screen to a magnified view.
6 [Status/Job Cancel] key: Displays the Status/Job Cancel screen.
7 [System Menu/Counter] key: Displays the System Menu screen.
8 [Reset] key: Returns settings to their default states.
9 [Stop] key: Cancels or pauses the job in progress.
10 [Start] key: Starts copying and scanning operations and processing for setting operations.
11 [Interrupt] key: Displays the Interrupt Copy screen.
12 [Authentication/Logout] key: Authenticates user switching, and exits the operation for the current user (i.e. log out).
13 [Energy Saver] key: Puts the machine into Sleep Mode. Recovers from Sleep if in Sleep Mode.
14 [Attention] indicator: Lights or blinks when an error occurs and a job is stopped.
15 [Memory] indicator: Blinks while the machine is accessing the hard disk, fax memory or USB memory (general purpose item).
16 [Processing] indicator: Blinks while printing or sending/receiving.
17 Touch Panel: Displays icons for configuring machine settings.
Before Using the Fax Machine > Part Names and Functions

**Touch Panel**

**Home Screen**

This screen is displayed by selecting the [Home] key on the operation panel. Selecting an icon will display the corresponding screen.

You can change the icons to display on the Home screen as well as its background.

[Machine’s Operation Guide](#)

![Home Screen Diagram](image)

* The appearance may differ from your actual screen, depending on your configuration and option settings.

<table>
<thead>
<tr>
<th>No.</th>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Message</td>
<td>Displays the message depending on the status.</td>
</tr>
<tr>
<td>2</td>
<td>Desktop</td>
<td>Displays function icons including the functions registered in program. Icons that are not displayed on the first page will appear by changing the page.</td>
</tr>
<tr>
<td>3</td>
<td>Screen-switching keys</td>
<td>Use these buttons to switch between desktop pages.</td>
</tr>
<tr>
<td></td>
<td></td>
<td><strong>NOTE</strong></td>
</tr>
<tr>
<td></td>
<td></td>
<td>You can also switch views by touching the screen and moving the finger sideways (i.e. swiping).</td>
</tr>
<tr>
<td>4</td>
<td>Taskbar</td>
<td>Displays task icons.</td>
</tr>
<tr>
<td>5</td>
<td>[Logout]</td>
<td>Logs out the current user. This is displayed when user login administration is enabled.</td>
</tr>
<tr>

<td>Login User Name</td>
<td>Displays the logged-in user name. This is displayed when user login administration is enabled. Selecting &quot;Login User Name&quot; will display the information of the logged-in user.</td>
</tr>
</tbody>
</table>
Operating the touch panel

1 Displays the status of the equipment as well as necessary operation messages.
2 Shows an image of the document to be sent.
3 Original : Shows the original size when the original is placed.
Zoom : Shows the magnification of the document to be sent.
Send : Shows the size of the document to be sent.
4 Displays the Quick Setup screen.
5 Set the fax functions.
6 Remaining amount of toner.
7 Displays the time.
8 Displays registered shortcuts.
9 Displays the destinations.

Previewing Images

You can display a preview image of a scanned original on the panel to check the image to be sent.

1 Display the screen.
Prepare to send the image as described in Basic transmission procedure.

   Basic transmission procedure (page 3-2)

2 Display a preview image.

   1 Select [Preview].
2 Select [Detail].

You can check the sending image in greater detail.

![Fax machine interface with detail and zoom options](image)

In magnified view, you can move the range of display.

**NOTE**

If the transmission functions below are modified, the results are applied in the preview image.

- Scan Resolution
- Scan Density
- Original Size Selection
- Sending Size Selection
- Original Orientation
- Selection of Image Quality
- Border Erase
- Zoom

Fax transmission functions (page 3-18)

If you have placed a multiple-page original in the document processor, the machine scans all the originals but only the first page is previewed. [Detail] can be selected to view all preview images. Select [>] to move through the preview images in the order they were scanned.

You cannot change the transmission functions while the preview image is displayed.

To change any of the transmission functions, select the [Stop] key or select [Cancel]. The preview image disappears and the destination is cancelled. To see the preview again, make the transmission function changes and select the destination.
3 Press the [Start] key to send the fax.
Transmission begins.

NOTE
When [On] is selected in [Destination Check before Send], a destination confirmation screen is displayed when you press the [Start] key.

Machine’s Operation Guide
To see a preview image when you are using the document processor, place the originals in the document processor again.

A document stored in a polling box for polling transmission can be previewed in the same way.

Polling Communication (page 5-28)
You cannot preview images in the following situations:
• When you are using Mixed Sized Originals mode
• During a direct transmission
• During polling reception
• When [On] is selected in the Long Original setting

Using the Preview Screen
When the Preview screen is displayed, you can do the following by moving the finger that is touching the touch panel.

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Drag</td>
<td>With the finger touching the touch panel, slide the finger to move the position of the displayed preview.</td>
</tr>
<tr>
<td>Pinch in</td>
<td>With two fingers touching the touch panel, widen or tighten the space between the two fingers to zoom in and out on the view.</td>
</tr>
<tr>
<td>Pinch out</td>
<td></td>
</tr>
</tbody>
</table>
Entering Numbers

NOTE
Numeric keys do not appear on the touch panel if an optional numeric keypad is installed.

When Numeric Keys are Provided on the FAX Base Screen
There are numeric keys on the fax base screen. Use these numeric keys to enter the destination number.

1. Enter numbers and symbols.
2. Clear entered numbers.
3. Quick No. Search key.
   ➤ Using the Quick No. Search Key (page 2-10)
4. Entry by numeric keys is confirmed.
   ➤ Using the Enter Key (page 2-10)

When Numeric Keys are not Provided on the FAX Base Screen
When entering numbers, numeric keys appear on the touch panel if you select the [Numeric Keypad] key on the operation panel or select the area in which the number is entered.

Example: When searching for an address number
Using the Enter Key

The Enter key has the same function as the key with the Enter mark (←), such as the [OK ←] key and the [Close ←].

Using the Quick No. Search Key

The Quick No. Search key performs the same action as the [No.] displayed on the touch panel. Use the Quick No. Search keys to perform an action by simply entering a number directly using the numeric keys. For example, you can specify the speed dial for a transmission destination or recall a stored program by its program number.

For more information on speed dialing, refer to the following:

Choosing from the Speed Dial (page 3-11)

NOTE

• Moving your finger while touching the top of the numeric keypad enables you to freely move to any key. (Drag operation)
# Quick Setup Wizard

In quick setup mode, a wizard is used to configure the following settings. Be sure to complete the settings before using the fax system.

## Fax setup items

<td>Returns to the previous screen.</td>
</tr>
</tbody>
</table>
Setting Date and Time

Set the local date and time at the place of installation.
When you send a fax using the transmission function, the date and time as set here will be printed in the header of the fax. Set the date, time and time difference from GMT of the region where the machine is used.

**NOTE**
Be sure to set the time difference before setting the date and time.

If the login user name entry screen appears during operations, log in by referring to the machine’s Operation Guide for Administrator User Name and Password.

The factory default login user name and login password are set as shown below.

<table>
<thead>
<tr>
<th>Model Name</th>
<th>Login User Name</th>
<th>Login Password</th>
</tr>
</thead>
<tbody>
<tr>
<td>TASKalfa 2552ci</td>
<td>2500</td>
<td>2500</td>
</tr>
<tr>
<td>TASKalfa 3011i</td>
<td>3000</td>
<td>3000</td>
</tr>
<tr>
<td>TASKalfa 3252ci</td>
<td>3200</td>
<td>3200</td>
</tr>
<tr>
<td>TASKalfa 3511i</td>
<td>3500</td>
<td>3500</td>
</tr>
<tr>
<td>TASKalfa 4002i/TASKalfa 4052ci</td>
<td>4000</td>
<td>4000</td>
</tr>
<tr>
<td>TASKalfa 5002i/TASKalfa 5052ci</td>
<td>5000</td>
<td>5000</td>
</tr>
<tr>
<td>TASKalfa 6002i/TASKalfa 6052ci</td>
<td>6000</td>
<td>6000</td>
</tr>
</tbody>
</table>

1. **Display the screen.**
   [System Menu/Counter] key > [Date/Timer/Energy Saver]

2. **Configure the settings.**
   Select and set in the order [Time Zone] > [Date/Time] > [Date Format]

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Time Zone</td>
<td>Set the time difference from GMT. Choose the nearest listed location from the list. If you select a region that utilizes summer time, configure settings for summer time.</td>
</tr>
</tbody>
</table>
| Date/Time          | Set the date and time for the location where you use the machine. When the machine sends a fax, the date and time set in the machine are recorded in the fax header.  
                      **Value:** Year (2000 to 2037), Month (1 to 12), Day (1 to 31), Hour (00 to 23), Minute (00 to 59), Second (00 to 59) |
| Date Format        | Select the display format of year, month, and date. The year is displayed in Western notation.  
                      **Value:** Month/Day/Year, Day/Month/Year, Year/Month/Day |
Registering Destinations in the Address Book

Save frequently used destinations to the Address Book or One Touch Key. The saved destinations can be changed. The destinations are available for Send as E-mail, Send to Folder, and Fax Transmission.

### Adding a Destination (Address Book)

Add a new destination to the Address Book. There are two registering methods, contacts and groups. When adding a group, enter the group name and select group members from the Address Book.

1. Display the screen.
   
   [System Menu/Counter] key > [Edit Destination] > "Address Book" [Add/Edit] > [Add] > [Contact] > [Next]

2. Add the name.
   
   1. Select "Address Number" [Change].
   2. Use [+] / [-] or the numeric keys to enter an address number (1 to 2500).
      
      To have the number assigned automatically, enter "0000".

   **NOTE**
   
   Address Number is an ID for a destination. You can select any available number out of 2,000 numbers for contacts and 500 numbers for groups.
   
   If you specify an address number that is already in use, an error message appears when you select [Save] and the number cannot be registered. If you set "0000" as the address number, the address is registered under the lowest available number.

3. Select [OK].
   
   The screen shown in step 1 reappears.

4. Select "Name" [Change].
5 Enter the destination name to be displayed on the Address Book and select [OK].

The screen shown in step 1 reappears.

**NOTE**
Up to 32 characters can be entered.
Refer to the following for details on entering characters.

⇒ [Character Entry Method (page 12-2)]

3 Enter the fax number.

1 Select [FAX].

2 Enter the fax number of the receiving system.

**NOTE**
Up to 32 digits can be entered.
Use the numeric keys to enter a number.

<table>
<thead>
<tr>
<th>Key</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pause</td>
<td>Selecting this key adds about three seconds of waiting time during dialing. For example, when dialing the receiving system on an external line, you can use this method to insert a pause before resuming dialing after you dial a specific number.</td>
</tr>
<tr>
<td>Space</td>
<td>It is possible to enter half-width spaces in the entry of the destination number. This is useful when checking if the destination number has been entered correctly.</td>
</tr>
<tr>
<td>&lt; &gt;</td>
<td>Moves the cursor.</td>
</tr>
<tr>
<td>Backspace</td>
<td>To correct the fax number, select [Backspace] on the touch panel, and delete the digits one by one before reentering the fax number. To delete the number entirely, select the [Clear] key on the numeric keys.</td>
</tr>
</tbody>
</table>

4 Set a sub address.

To use sub address communication, a sub address and password must be registered.

1 Select "Sub Address" [Change].

2 Enter the sub address and password, and select [OK].
For the procedure for setting a sub address, refer to the following:

⇒ [Sub Address Transmission (page 5-25)]
5 Configure the transmission settings.
The transmission start speed, ECM, and encrypted key No. can be set.
"TX Start Speed", "ECM and Encryption Key No." [Change], set each item then select [OK].

<table>
<thead>
<tr>
<th>Key</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Encryption Key No.</td>
<td>This is set when using encrypted transmission to send the data.</td>
</tr>
<tr>
<td></td>
<td>[Using the Encrypted Transmission (page 5-37)]</td>
</tr>
<tr>
<td>TX Start Speed</td>
<td>This is set to change the transmission start speed. Select the speed from 33,600 bps, 14,400 bps, and 9,600 bps.</td>
</tr>
<tr>
<td></td>
<td>[NOTE] Normally the default setting should be used.</td>
</tr>
<tr>
<td>ECM</td>
<td>ECM is a communication mode specified by the ITU-T (International Telecommunication Union) that retransmits data when an error occurs. Fax machines that have ECM mode check for errors as they communicate, preventing distortion of the image due to noise on the line and other conditions.</td>
</tr>
</tbody>
</table>

6 Check if the destination entry is correct > [Save]
The destination is added to the Address Book.
To register the registered address in a one-touch key, select [Save] > [Yes]

[NOTE]
Refer to the following for registering the One Touch Key.
[Adding a Destination on One Touch Key (page 2-24)]
Registering a contact address (i-FAX)

Up to 2,000 contacts can be registered. Contact name, i-FAX address, transmission mode and the conditions for the destination machine can be registered for each contact.

**NOTE**
For details, refer to the following:

> Internet Faxing (i-FAX) (page 10-1)

1. **Display the screen.**
   
   [System Menu/Counter] key > [Edit Destination] > "Address Book" [Add/Edit] > [Add] > [Contact] > [Next]

2. **Add the name.**
   
   1. Select "Address Number" [Change].
   2. Use [+]/[-] or the numeric keys to enter an address number (1 to 2500).
      
      To have the number assigned automatically, enter "0000".

      **NOTE**
      Address Number is an ID for a destination. You can select any available number out of 2,000 numbers for contacts and 500 numbers for groups.
      
      If you specify an address number that is already in use, an error message appears when you select [Save] and the number cannot be registered. If you set "0000" as the address number, the address is registered under the lowest available number.

   3. Select [OK].
      The screen shown in step 1 reappears.

   4. Select "Name" [Change].

   5. Enter the destination name to be displayed on the Address Book and select [OK].
      The screen shown in step 1 reappears.

      **NOTE**
      Up to 32 characters can be entered.
      
      Refer to the following for details on entering characters.

      ➤ Character Entry Method (page 12-2)

3. **Enter the destination i-FAX address (Email address).**
   
   1. Select [i-FAX].
   2. Select "i-FAX Address" [Change].
3 Enter the destination i-FAX address (E-mail address) and select [OK].
To send by Direct SMTP, enter the IP address of the other machine.

**NOTE**
Up to 128 characters can be entered.
For details on character entry, refer to the following:
* Character Entry Method (page 12-2)

4 **Configure the transmission settings.**

1 Select "Mode" [ ] and select [Simple] or [Full].

2 Select "Via Server" [ ] and select [On] or [Off].
When this setting is set to [Off], transmission takes place by direct SMTP (not through an e-mail server).
When this setting is set to [On], transmission takes place by the i-FAX method (through an e-mail server).

3 Select "Paper Size" [Change].

4 Specify the destination conditions and select [OK].

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Resolution</td>
<td>Specify the resolutions that can be received by the destination fax machine. If you try to send an i-FAX using a prohibited resolution, it is automatically changed to a permitted resolution and then sent.</td>
</tr>
<tr>
<td>Compression</td>
<td>Select a suitable file format for the destination fax machine. MH, MR, MMR or JBIG</td>
</tr>
<tr>

<td>Display the sending paper size for the destination fax machine.</td>
</tr>
<tr>
<td></td>
<td>• A4/Letter: Permitted (fixed)</td>
</tr>
<tr>
<td></td>
<td>• B4: Permitted or prohibited</td>
</tr>
<tr>
<td></td>
<td>• A3/Ledger: Permitted or prohibited</td>
</tr>
</tbody>
</table>
Before Using the Fax Machine > Registering Destinations in the Address Book

5 Check if the destination entry is correct > [Save]

The destination is added to the Address Book.

To register the registered address in a one-touch key, select [Save] > [Yes]

NOTE
Refer to the following for registering the One Touch Key.
⇒ Adding a Destination on One Touch Key (page 2-24)

Adding a Group

Compile two or more contacts into a group. Designations in the group can be added at the same time. When adding a group, a maximum of 500 groups can be added in the Address Book.

NOTE
To add a group, you need individually added destinations. Register one or more individual destinations as needed before proceeding. Up to 100 destinations for the E-mail, 500 destinations for the FAX, 100 destinations for the i-FAX, and a total of 10 destinations for the FTP and SMB can be registered per group.

1 Display the screen.

[System Menu/Counter] key > [Edit Destination] > "Address Book" [Add/Edit] > [Add] > [Group] > [Next]

2 Add the name.

1 Select "Address Number" [Change].

2 Use [+] / [-] or the numeric keys to enter an address number (1 to 2,500).

To have the number assigned automatically, set "0000".

NOTE
Address Number is an ID for a group. You can select any available number out of 2,000 numbers for contacts and 500 numbers for groups.

If you specify an address number that is already in use, an error message appears when you select [Save] and the number cannot be registered. If you set "0000" as the address number, the address is registered under the lowest available number.

3 Select [OK]. The "Add Group" screen reappears.

4 Select "Name" [Change].

5 Enter the group name displayed on the Address Book > [OK]

The "Add Group" screen reappears.

NOTE
Up to 32 characters can be entered.

Refer to the following for details on entering characters.
⇒ Character Entry Method (page 12-2)
3 Select the members (destinations).

1 [Member] > [Add]

2 Select destinations (contacts) to add to the group > [OK]

3

NOTE
Destinations can be sorted or searched by destination name or address number.

Choosing from the Address Book (page 3-9)

If you have more destinations to add, repeat Steps 2.

4 Check if the selected destination was added to the group > [Save]

The group is added to the Address Book.

To register the registered address in a one-touch key, select [Save] > [Yes]

4

NOTE
Refer to the following for registering the One Touch Key.

Adding a Destination on One Touch Key (page 2-24)
Editing Address Book Entries

Edit the destinations (contacts) you added to the Address Book.

1. **Display the screen.**
   2. Select a destination or group to edit > [Detail]

   **NOTE**
   Destinations can be sorted or searched by destination name or address number.
   ➤ Choosing from the Address Book (page 3-9)

2. **Edit the destination.**
   **Editing a Contact**
   1. Change "Name", "Address Number" and destination type and address.
      ➤ Adding a Destination (Address Book) (page 2-15)
   2. [Save] > [Yes]
      Register the changed destination.

   **Add a destination to a group**
   1. Change "Name" and "Address Number".
      ➤ Adding a Group (page 2-20)
   2. [Member] > [Add]
   3. After you have completed the changes, [Save] > [Yes]
      Register the changed destination.

   **To delete any destination from the group**
   1. [Member] > Select the delete destination > [Delete] > [Yes]
   2. After you have completed the changes, [Save] > [Yes]
      Register the changed destination.
Deleting Address Book Entries
Delete the destinations (contacts) you added to the Address Book.

1 Display the screen.
   1 [System Menu/Counter] key > [Edit Destination] > "Address Book" [Add/Edit]
   2 Select a destination or group to delete > [Detail]

   ![NOTE]
   Destinations can be sorted or searched by destination name or address number.
   ![Choosing from the Address Book (page 3-9)]

2 [Delete] > [Yes]
Delete the contact or group.

Printing Address List
You can print the list of destinations registered in the Address Book.
You can sort the list in the order of index or address numbers of the destinations.

1 Display the screen.
   [System Menu/Counter] key > [Edit Destination] > [Print List]

2 Print.
   [FAX List (Index)] or [FAX List (No.)] > [Yes]
The list is printed.
Adding a Destination on One Touch Key

Assign a new destination (contact or group) to an one touch key. A maximum of 1,000 destinations can be registered.

1 Display the screen.

[System Menu/Counter] key > [Edit Destination] > "One Touch Key" [Add/Edit]

2 Add One Touch Keys.

1 Select a One Touch Key number (001 to 1000) for the destination > [Add/Edit]
   Selecting [No.] or the Quick No. Search key on the numeric keypad enables direct entry of a One Touch Key number.

   NOTE
   For details of Quick No. Search key, refer to the following:
   ➤ Using the Quick No. Search Key (page 2-10)

Select a One Touch Key with no registered destination.

2 Select "Display Name" [Change].

3 Enter the One Touch Key name displayed in the send base screen > [Next]

   NOTE
   Up to 24 characters can be entered.
   Refer to the following for details on entering characters.
   ➤ Character Entry Method (page 12-2)

4 Select "Destination" [Change].

   The Address Book appears.
Before Using the Fax Machine > Registering Destinations in the Address Book

5 Select a destination (contact or group) to add to the One Touch Key number > [OK]
Selecting [Detail] shows the detailed information of the selected destination.

![NOTE]
Destinations can be sorted or searched by destination name or address number.
[Choosing from the Address Book (page 3-9)]

6 Select [Save].
The destination will be added to the One Touch Key.

Editing One Touch Key

1 Display the screen.
   1 [System Menu/Counter] key > [Edit Destination] > "One Touch Key" [Add/Edit]
   2 Select a One Touch Key number (0001 to 1000) to edit. Selecting [No.] or the Quick No. Search key on the numeric keypad enables direct entry of a One Touch Key number.

2 Changing the Registered Information.
   1 Select [Add/Edit].
   2 Select a new destination (contact or group). Selecting [Detail] shows the detailed information of the selected destination.

![NOTE]
Destinations can be sorted or searched by destination name or address number.
[Choosing from the Address Book (page 3-9)]

3 [OK] > [OK] > [Save] > [Yes]
Add the destination to the One Touch Key.

Deleting the Destination to the One Touch Key

1 Display the screen.
   1 [System Menu/Counter] key > [Edit Destination] > "One Touch Key” [Add/Edit]
   2 Select a One Touch Key number (0001 to 1000) to edit. Selecting [No.] or the Quick No. Search key on the numeric keypad enables direct entry of a One Touch Key number.

2 Delete the Registered Information.
Select [Delete] > [Yes]
The data registered in the One Touch Key is deleted.
Quick Setup Screen

To display the Quick Setup Screen, which shows frequently used fax send settings, select [Quick Setup] tab in the fax base screen.

![Quick Setup Screen](image)

**NOTE**

The settings that can be configured in the Quick Setup Screen are basic settings. To configure advanced settings, use the [Org./Sending Data Format], [Image Quality], and [Advanced Setup] screens.

Functions Available for Registration in the Quick Setup Screen

Default registrations and the functions available for registration are as follows.

<table>
<thead>
<tr>
<th>Default Registration</th>
<th>Functions Available for Registration</th>
</tr>
</thead>
<tbody>
<tr>
<td>1: Original Size</td>
<td>Original Size</td>
</tr>
<tr>
<td>2: FAX TX Resolution</td>
<td>2-sided/Book Original</td>
</tr>
<tr>
<td>3: Density</td>
<td>Sending Size</td>
</tr>
<tr>
<td>4: 2-sided/Book Original*1</td>
<td>Original Orientation</td>
</tr>
<tr>
<td>5: Continuous Scan</td>
<td>Density</td>
</tr>
<tr>
<td>6: Original Image</td>

<td>Continuous Scan</td>
</tr>
</tbody>
</table>

*1 This is "Book original" if the optional document processor is not installed.
Changing Registration

The following procedure is one example for replacing the registration of [Density] with [Zoom] in the Quick Setup Screen for faxing.

1. Display the screen.
   [System Menu/Counter] key > [FAX] > "Quick Setup Registration" [Next] > "Zoom" [Change]

2. Changing Registration.
   1. Select [Key 3] here as the key to set replacement location.

   2. [OK] > [Yes]
      [Zoom] will be Key 3 newly registered.
Before Using the Fax Machine > Registering Shortcuts

Registering Shortcuts

You can register shortcuts in the Quick Setup screen for easy access to the frequently used functions. The settings for the selected function can also be registered. A function name linked to a registered shortcut can be changed as necessary.

Adding Shortcuts

Shortcut registration is performed in the setup screen of each function. Shortcuts can be registered for all functions in which [Add Shortcut] appears on the screen.

1 In each function, display the configuration screen you want to register.

2 Register the shortcuts.
   1 Select the setting you want to add.
   2 Select [Add Shortcut].

3 Select the keys corresponding to the shortcut number (1 to 6) to register.

   NOTE
   If you select a shortcut number already registered, the currently registered shortcut can be replaced with a new one.

4 Enter the shortcut name > [Save].

The shortcut is registered.
Before Using the Fax Machine > Registering Shortcuts

## Editing Shortcuts

1. In the setup screen of each function, select [Add Shortcut] in the bottom of the screen.

2. **Edit the shortcut**
   1. Select [Edit].
   2. Select the shortcut key you want to edit.
   3. Select "Shortcut No" [Change] or "Shortcut Name" [Change] > Change the settings > [OK].
   4. [Save] > [Yes]

## Deleting Shortcuts

1. In the setup screen of each function, select [Add Shortcut] in the bottom of the screen.

2. **Delete the shortcut**
   1. Select [Edit].
   2. Select the shortcut key you want to delete > [Delete this Shortcut] > [Yes]
3 Sending Faxes

  Using chain dial ......................... 3-33
  Using Program .................................. 3-35
Basic transmission procedure

The basic procedure for using the fax system is explained below.

   The base screen for fax appears.

2. Place the originals.

   ![Image of placing originals]

   For placing originals, refer to the following:
   ➪ Machine’s Operation Guide

3. Select the transmission method.
   There are two transmission methods: memory transmission and direct transmission.
   
   **Memory transmission**: The original is scanned into memory before communication starts. Memory transmission is selected by default.
   
   **Direct transmission**: The destination is dialed and communication starts before the original is scanned.
   
   Select [Direct] to change the transmission method to direct transmission. The key will be highlighted on the touch panel. If the [Direct] is selected in the highlighted state, the transmission method will change to memory transmission.
   
   ➪ FAX Direct Transmission (page 3-28)

4. Specifying destination.
   Specify the transmission destination.
   
   ➪ Methods For Entering the Destination (page 3-7)

5. Selecting the functions.
   Select the tab, and set transmitting functions that can be used.
   
   ➪ Fax transmission functions (page 3-18)
6 **Send Start.**

Press the [Start] key.

When scanning finishes, transmission starts.

**When originals are placed in the document processor**

After originals placed in the document processor are scanned and stored in the memory, the receiving system is dialed.

**When originals are placed on the glass surface**

After originals placed on the glass surface are scanned and stored in the memory, the receiving system is dialed.

![NOTE]

When continuous scan is set, you can continue with scanning of a next original after an original on the glass surface has been stored in memory. Every time one page is scanned, you perform an operation to allow continued scanning, and after all the originals have been stored in memory, the receiving system is dialed.

[Continuous Scan (page 3-27)]

If there is no response from the other machine when you attempt to send, the machine will automatically redial (auto redial). You can change the number of auto redial attempts.

[Retry Times (page 8-10)]

---

**Using redial**

Redial is a function allowing you to dial the last entered number once again.

Use this when the receiving system does not respond when you have tried to send a fax. When you want to send the fax to the same receiving system, select [Recall], and you can call the receiving system you dialed on the destination list.

1 **Select [Recall].**

2 **Press the [Start] key.**

The transmission will start.

![NOTE]

Recall information is canceled in the following conditions.

- When you turn the power off
- When you send a next fax (new recall information is registered)
- When you log out
Checking the Send Status

1. Select the [Status/Job Cancel] key.

2. Display the send job status screen.
   Select [Sending Jobs].
   The list of accepted time, destination, and status are displayed for each job.

Priority Override Send

A fax job waiting to be sent can be sent by priority override.

1. Select the [Status/Job Cancel] key.

2. Select the job to be sent by priority override.
   
   1. Select [Sending Jobs].

   2. Select the fax job to be sent by priority override and select [Priority Override] > [Yes].
      The selected fax job is sent by priority override and other fax jobs are moved down in the transmission queue.

   
   NOTE
   If a fax job is in progress, the priority override fax job will be sent after the job in progress is completed.

If a broadcast transmission job is in progress...

If a fax job to multiple destinations (broadcast transmission) is in progress, the priority override job will be sent when transmission to the current destination is completed. When the priority override job is completed, transmission to the remaining destinations will resume.

However, if the priority override job is a broadcast transmission, the priority override job will not start until the current broadcast transmission job is finished.
Cancelling Memory Transmission (while originals are being scanned)

1 Select the [Stop] key.

During memory transmission, to cancel scanning while originals are being scanned, select the [Stop] key on the operation panel, or select [Cancel] on the touch panel. Scanning of originals is canceled, and the originals are ejected. When originals remain in the document processor, take them out from the original table.

Cancelling Memory Transmission (during communication)

NOTE
Even if transmission is canceled, there is a possibility that pages scanned prior to cancelation were sent to the receiving party. Check with the receiving party to see if pages were accidentally sent.

1 Select the [Status/Job Cancel] key.

2 Canceling Transmission.

   1 Select [Sending Jobs].

   2 Select the transmission job that you want to cancel and select [Cancel] > [Yes] Cancel the transmission.

NOTE
In some cases, transmission may take place even if the [Stop] key or [Cancel] is selected.
Cancelling Transmission (Disconnection of Communication)

Follow this procedure to break the connection and stop communication.

NOTE
Even if transmission is canceled, there is a possibility that pages scanned prior to cancelation were sent to the receiving party. Check with the receiving party to see if pages were accidentally sent.

When 2 optional FAX Kits (Dual FAX option) are installed, disconnect the line currently being used for communication.

1. Select the [Status/Job Cancel] key.

2. Disconnection of communication.

   [Device/Communicate] > "FAX Port 1" or "FAX Port 2" [Line Off]

   NOTE
   To cancel direct transmission, delayed transmission, or polling transmission, refer to the section for that function.

   To cancel direct transmission, refer to the following:
   ➤ Cancelling Direct Transmission (page 3-28)

   To cancel a delayed transmission or send a fax by immediate transmission, refer to the following:
   ➤ Cancelling Delayed Transmissions (Queued) (page 3-27)

   To cancel polling transmission, refer to the following:
   ➤ Polling Reception (page 5-31)
Methods For Entering the Destination

Entering the destination fax number with the numeric keys

The procedure for entering the destination fax number with the numeric keys is explained below.

NOTE

If [New Destination Entry(FAX)] is set to [Prohibit], it is not possible to directly enter a fax number. Select the destination from the Address Book or the One Touch Key.

New Destination Entry(FAX) (page 8-14)

2. Enter the fax number of the receiving system.

NOTE

Up to 64 digits can be entered.

Use the numeric keys to enter a number.

<table>
<thead>
<tr>
<th>Key</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pause</td>
<td>Selecting this key adds about three seconds of waiting time during dialing. For example, when dialing the receiving system on an external line, you can use this method to insert a pause before resuming dialing after you dial a specific number.</td>
</tr>
<tr>
<td>Space</td>
<td>It is possible to enter half-width spaces in the entry of the destination number. This is useful when checking if the destination number has been entered correctly.</td>
</tr>
<tr>
<td>&lt; &gt;</td>
<td>Moves the cursor.</td>
</tr>
<tr>
<td>Backspace</td>
<td>To correct the fax number, select [Backspace] on the touch panel, and delete the digits one by one before reentering the fax number. To delete the number entirely, select the [Clear] key on the operation panel.</td>
</tr>
<tr>
<td>On Hook</td>
<td>Select [On Hook] to connect to the telephone line. When the FAX number has been entered, the machine starts dialing to the receiving system. After selecting this key, you can dial the number of the receiving system using the numeric keys.</td>
</tr>
</tbody>
</table>

Manual Send (page 3-30)
3 Select transmission settings.
Select [Detail].
Sub address communication, encrypted transmission, transmission start speed and ECM can be set.

<table>
<thead>
<tr>
<th>Key</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sub Address</td>
<td>Set this to transmit using a Sub Address.</td>
</tr>
<tr>
<td>TX Start Speed</td>
<td>This is set to change the transmission start speed. Select the speed from</td>
</tr>
<tr>
<td></td>
<td>33,600 bps, 14,400 bps, and 9,600 bps.</td>
</tr>
<tr>
<td>ECM</td>
<td>ECM is a communication mode specified by the ITU-T (International</td>
</tr>
<tr>
<td></td>
<td>Telecommunication Union) that retransmits data when an error occurs.</td>
</tr>
<tr>
<td></td>
<td>Fax machines that have ECM mode check for errors as they communicate,</td>
</tr>
<tr>
<td></td>
<td>preventing distortion of the image due to noise on the line and other</td>
</tr>
<tr>
<td></td>
<td>conditions.</td>
</tr>
<tr>
<td>Encrypted Transmission</td>
<td>This is set when using encrypted transmission to send the data.</td>
</tr>
</tbody>
</table>

NOTE
When On is selected in Entry Check for New Dest., a confirmation screen is displayed for the entered FAX number. Re-enter the same FAX number and select [OK].

Select [FAX Entry] to enter the next fax number.

4 Select [OK].
Entry of the destination finishes.

NOTE
When [Broadcast] is set to [Prohibit], it is not possible to enter multiple destinations.

In addition to a fax, you can include e-mail transmission and folder (SMB/FTP) transmission to send as one job.

When is displayed, you can register entered contents to the Address Book.
Choosing from the Address Book

Select a destination registered in the Address Book.

1 In the basic screen for sending, select [Address Book].

   NOTE
   For more information about how to register destinations in the Address Book, refer to the following:
   ➤ Registering Destinations in the Address Book (page 2-15)

2 Select the destinations.

   Select the checkbox to select the desired destination from the list. The selected destinations are indicated by a checkmark in the check box. To use an address book on the LDAP server, select "Addr Book" [Ext Address Book].

   You can change the order in which the destinations are listed by selecting [Name] or [No.] from the "Sort".

   NOTE
   • To deselect, select the checkbox again and remove the checkmark.
   • If [Broadcast] is set to [Prohibit], it is not possible to select multiple destinations. Also, it is not possible to select a group that has multiple destinations registered.
Destination Search

Destinations registered in the Address Book can be searched. Advanced search by type or by initial letter is also available.

<table>
<thead>
<tr>
<th>Keys used</th>
<th>Search type</th>
<th>Subjects searched</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Search by name</td>
<td>Search by registered name.</td>
</tr>
<tr>
<td>2</td>
<td>Search by number</td>
<td>Search by registered address number.</td>
</tr>
<tr>
<td>3</td>
<td>Advanced search by initial letter</td>
<td>Advanced search by initial letter of registered name.</td>
</tr>
<tr>
<td>4</td>
<td>Advanced search by destination</td>
<td>Advanced search by type of registered destination (FAX, i-FAX or Group). (i-FAX: Only when the optional Internet FAX Kit is activated.) You can set this function up so that destination types are selected when the address book is displayed. For details, refer to the following: Machine’s Operation Guide</td>
</tr>
</tbody>
</table>

3 Accept the destination > [OK]

Destinations can be changed later.

Confirmation Screen of Destinations (page 7-13)

NOTE

To delete the destination, select the destination you want to delete and select [Delete].

You can set the default "Sort" settings.

Machine’s Operation Guide
Choosing from the One Touch Key

Select the destination using the One Touch Keys.

In the basic screen for sending, select the One Touch Keys where the destination is registered.

**NOTE**

If the One Touch Keys for the desired destination is hidden on the touch panel, select [▲] or [▼] to scroll and view next or previous One Touch Keys. This procedure assumes that One Touch Keys have already been registered. For more information on adding One Touch keys, refer to the following:

➤ Adding a Destination on One Touch Key (page 2-24)

Choosing from the Speed Dial

Access the destination by specifying the 4-digit (0001 to 1000) One Touch Key number (speed dial).

In the basic screen for sending, select [No.] or the Quick No. Search key on the numeric keypad and use the numeric keys to enter the speed dial number in the numeric entry screen.

**NOTE**

If you entered the speed dial in 1 to 3-digit, select [OK].
Checking and Editing Destinations
Check and edit a selected destination.

1 **Display the screen.**
   Specify the destination.
   ➤ [Methods For Entering the Destination (page 3-7)]

2 **Check and edit the destination.**
   Select a destination and select [Detail/Edit] to check it. The entered addresses can be edited if they have been specified.
   Select a destination and select [Delete] to remove the destination from the list.

**NOTE**
- When selecting [On] for Entry Check for New Destination, the confirmation screen appears. Enter the same FAX No. and sub address again, and select [OK].
  ➤ Machine’s Operation Guide
- When selecting [On] for Destination Check before Send, the confirmation screen appears after pressing the [Start] key.
  ➤ Machine’s Operation Guide
Broadcast Transmission

This function allows you to send the same originals to several destinations in one operation. The machine stores (memorizes) originals to send in memory temporarily, and automatically repeats dialing and transmission to the set destination afterwards.

NOTE
When using a group for the destination, you can send originals to up to 500 destinations in one operation.
You can use this function together with sub address communication and delayed transmission.
When direct transmission has been selected, it changes to memory transmission at the time of transmission.
If [Broadcast] is set to [Prohibit], broadcast transmission is not possible.

Sending using FAX Address

1 Select [FAX] on the Home screen.

2 Specify the destination.

Enter the fax number

NOTE
If [New Destination Entry(FAX)] is set to [Prohibit], it is not possible to directly enter a fax number. Select the destination from the Address Book or the One Touch Key.

NOTE
Up to 64 digits can be entered.
Use the numeric keys to enter a number.

1 Enter the fax number of the receiving system.

NOTE
When [On] is selected in [Entry Check for New Dest.], a confirmation screen is displayed for the entered FAX number. Re-enter the same FAX number and select [OK].

Select the destination from the Address Book

1 Select [Address Book].
2 Select the checkboxes of all destinations and select [OK].

**NOTE**
For details of the Address Book, refer to the following:
- Choosing from the Address Book (page 3-9)

Select the destination from the One Touch Key

1 Select [One Touch Key].
2 Select all destinations and select [OK].

**NOTE**
For details of One Touch Key, refer to the following:
- Choosing from the One Touch Key (page 3-11)

3 After selecting all the destinations, press the [Start] key.

Sending using i-FAX Address

**NOTE**
For more information on sending an Internet FAX (i-FAX), refer to the following:
- Internet Faxing (i-FAX) (page 10-1)

1 Select [Send] on the Home screen.
2 Specify the destination.

Enter the i-FAX address

1 Select [i-FAX Address Entry].
2 Select [i-FAX Address] > Enter the i-FAX address > [OK] > [OK]
3 To continue entering a new address, select [i-FAX Address Entry] and repeat the above procedure.
4 When all destinations have been entered, select [OK].

Select the destination from the Address Book

1 Select [Address Book].
2 Select the checkboxes of all destinations and select [OK].

**NOTE**
For details of the Address Book, refer to the following:
- Choosing from the Address Book (page 3-9)
Select the destination from the One Touch Key

1. Select [One Touch Key].
2. Select all destinations and select [OK].

**NOTE**
For details of One Touch Key, refer to the following:
*Choosing from the One Touch Key (page 3-11)*

3. After selecting all the destinations, press the [Start] key.
Login/Logout

Logging in when User Login Administration has been Enabled

When user login administration has been enabled, you need to enter a User ID and Password to use the machine.

Normal login

1. Enter the login user name and login password to login.
   
   If this screen is displayed during operations, select [Login User Name] to enter the login user name.

   ![Login screen]

   - **Character Entry Method (page 12-2)**

2. [Login Password] > Enter the login password > [OK]

   **NOTE**
   When [# Keys] is selected, it is possible to enter numbers using the numeric keys.
   
   If [Network Authentication] is selected as the user authentication method, authentication destinations are displayed and either [Local] or [Network] can be selected as the authentication destination.
   
   To authenticate by ID card, select [ID Card Login].

Simple Login

If this screen is displayed during operations, select a user and log in.

**NOTE**
If a user password is required, an input screen will be displayed.

- **Machine’s Operation Guide**

3-16
Logout

To logout from the machine, select the [Authentication/Logout] key to return to the login user name/login password entry screen.

Logging in when Job Accounting has been Enabled

When job accounting has been enabled, you need to enter an Account ID when using the machine.

Login

1. In the account ID entry screen, enter the account ID using the numeric keys and select [Login].

   **NOTE**
   - If you entered a wrong character, select the [Clear] key and enter the account ID again.
   - If the entered account ID does not match the registered ID, a warning beep will sound and login will fail. Enter the correct account ID.
   - By selecting [Check Counter], you can refer to the number of pages printed and the number of pages scanned.

When the screen to enter the login user name and password appears

If user login administration is enabled, the screen to enter the login user name and password appears. Enter a login user name and password to login. If the user has already registered the account information, the account ID entry would be skipped.

  ➤ Machine's Operation Guide

2. Proceed to complete the rest of the steps.

Logout

When the operations are complete, select the [Authentication/Logout] key to return to the account ID entry screen.
Fax transmission functions

To configure the settings for functions, select the tab and select the function key.

For details on each function, see the table below.

<table>
<thead>
<tr>

<td>200 × 200 dpi Fine</td>
<td>when sending originals with relatively small characters and thin lines</td>
<td></td>
</tr>
<tr>
<td>200 × 100 dpi Normal</td>
<td>when sending originals with standard size characters</td>
<td></td>
</tr>
</tbody>
</table>

**NOTE**
The default setting is [200 × 100 dpi Normal]. The higher the resolution, the clearer the image, but the fax transmission time is longer.

**Zoom**

Scan originals by automatically zooming them according to the sending size.

*Value:* [100%] / [Auto]

**NOTE**
If the original is scanned at full size, the image may be reduced if a smaller paper size is set on the receiving machine.

**Centering**

When you have sent/stored the original after specifying the original size and sending size, depending on these sizes, a margin is created at the bottom, left, or right side of paper. By using the Centering function, the image is placed with a margin equally created for all edges.

*Value:* [Off] / [On]
Border Erase

Erases the black border that forms around the image. The following modes are available.

\(^{\dagger}\) The input units can be changed in System Menu.

→ Machine’s Operation Guide
## FAX Delayed Transmission

Set a send time. You can use delayed transmission together with the broadcast transmission function, etc.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Does not use the delayed transmission.</td>
</tr>
<tr>
<td>On</td>
<td>Uses the delayed transmission.</td>
</tr>
<tr>
<td>Start Time</td>
<td>Set the time from between 00:00 and 23:59 in one-minute increments.</td>
</tr>
</tbody>
</table>

**IMPORTANT**

If the current time displayed on the touch panel is not correct, you cannot send originals correctly at the preset time. In this case, adjust the time.

- Setting Date and Time (page 2-14)

**NOTE**

You cannot select direct transmission.

You can set up to 200 destinations for delayed transmission.

When two or more delayed transmissions are set for the same time, the communication will start in the order that the delayed transmissions have been set. When delayed transmissions have been set in reverse order, however, sending of originals to be sent to the same destination is prioritized over the ones to be sent to different destinations.

You can cancel a delayed transmission any time before the specified transmission time. You can also send a delayed transmission before the specified time.

- Cancelling Delayed Transmissions (Queued) (page 3-27)

You can change destinations of a delayed transmission any time before the specified transmission time.

- Changing/Deleting Delayed Transmission (page 3-26)

If you use delayed transmission when sending documents stored in the Custom Box by fax, you cannot move documents until sending is finished.

- Machine’s Operation Guide

### Batch Transmission Function

When fax originals to be sent to the same destination are set to the same transmission start time with delayed transmission, you can send up to 10 groups of originals using batch transmission. This function prevents repeated communication to the same destination and reduces the communication cost.

**NOTE**

You cannot send originals as a batch transmission in the case of direct transmission.

In the case of broadcast transmission, when you have set two or more groups of originals to the same transmission start time, and each group includes the same receiving system fax number, you cannot send the originals as a batch transmission.

When the transmission start time has come, and there are fax originals waiting for redial to the same receiving system, the waiting originals are also sent together as a batch transmission.

When job accounting is ON, only the originals with the same account ID set using delayed transmission are sent as a batch transmission.
Setting the Delayed Transmission

Changing/Deleteing Delayed Transmission

You can change or delete the destinations of delayed transmission.

Use the procedure below to check a job's information.

1 Display the screen.

1 [Status/Job Cancel] key > [Sending Jobs] > [Scheduled Job]
2 Select the job you want to change or delete from the list > [Detail]
   Detailed information of the selected job is displayed.
3 Select [Detail/Edit] in "Status/Destination".

2 Changing.

When adding another destination

1 Select the address to be added from the Address Book or enter the fax number using the numeric keys.

   When selecting [Address Book]
   Select the destination you want to change in the list > [OK]

   When entering the fax number using the numeric keys
   Enter the fax number using the numeric keys > [OK]

2 Select [OK].

   NOTE
   When [New Destination Entry(FAX)] is set to [Prohibit], the numeric keys cannot be used to enter a fax number.

   Machine’s Operation Guide

   When On is selected in Entry Check for New Dest., a confirmation screen is displayed for the entered FAX number. Re-enter the same FAX number and select [OK].

   New Destination Entry(FAX) (page 8-14)

When changing the destination to another destination

1 Select the destination you want to change > [Detail/Edit]
   You can change the selected destination.

2 Select [OK].

When deleting the destination

Select the destination you want to delete > [Delete] > [OK]
Cancelling Delayed Transmissions (Queued)

To cancel delayed transmissions that are queued, use the procedure below.

1. **Display the screen.**
   
   `[Status/Job Cancel] key > [Sending Jobs] > [Scheduled Job]`

2. **Canceling a job.**
   
   Select the job you want to cancel and select [Cancel] > [Yes].
   The selected job is deleted.

Immediate transmission

To send delayed transmissions immediately rather than waiting for the specified time, use the procedure below.

1. **Display the screen.**
   
   `[Status/Job Cancel] key > [Sending Jobs] > [Scheduled Job]`

2. **Immediate transmission.**
   
   Select the job you want to send by immediate transmission, and select [Start Now] > [Yes].
   The transmission will start.

Continuous Scan

Scans a large number of originals in separate batches and then produce as one job.

Originals will be scanned continuously until you select [Finish Scan].

You can set the functions that appear on the screen during scanning.

(\textbf{Value}: [Off] / [On])

Job Finish Notice

Sends E-mail notice when a job is complete. It is also available that send a notice when a job is interrupted.

Users can be notified of the completion of a job while working at a remote desk, saving the time spent waiting beside the machine to finish.

\textbf{NOTE}

PC should be configured in advance so that E-mail can be used.

- Machine’s \textit{Operation Guide}

E-mail can be sent to a single destination.

It is possible to attach an image to the e-mail notice.

- \textit{Job Finish Notice Setting (page 8-15)}
File Name Entry

Adds a file name.

Additional information such as job number and date and time can also be set. You can check a job history or job status using the file name, date and time, or job number specified here.

Select [File Name], enter the file name (up to 32 characters), and select [OK].

To add date and time, select [Date and Time]. To add job number, select [Job No.]. The added information will be displayed in "Additional Info".

FAX Direct Transmission

The destination is dialed and communication starts before the original is scanned, allowing you to verify that each page of the fax has been properly sent.

<table>
<thead>
<tr>
<th>Setting for Direct transmission</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Starts direct transmission. Dials the receiving system, and after the communication has started, originals are scanned.</td>
</tr>
<tr>
<td>Off</td>
<td>Starts memory transmission. After originals are scanned into memory, the communication starts.</td>
</tr>
</tbody>
</table>

**NOTE**

In direct transmission, you can designate only one destination for one transmission.

In the basic screen for sending, select [Direct]. This selects the direct transmission method and the keys on the touch panel are highlighted.

Cancelling Direct Transmission

During direct transmission, to cancel communication during transmission, select the [Stop] key on the operation panel or [Cancel] on the touch panel. The originals that have been scanned are ejected, and the screen returns to the send default screen. When originals remain in the document processor, take them out.

**NOTE**

In some cases, transmission may take place even if the [Stop] key or [Cancel] is selected.
Send and Print

Prints a copy of the document being sent.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Does not print a copy of the document being sent.</td>
</tr>
<tr>
<td>On</td>
<td>Prints a copy of the document being sent.</td>
</tr>
</tbody>
</table>

Send and Store

Stores a copy of the document being sent in a Custom Box.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Does not store a copy of the document being sent in a Custom Box.</td>
</tr>
<tr>
<td>On</td>
<td>Store a copy of the document being sent in a Custom Box.</td>
</tr>
</tbody>
</table>

**NOTE**

When [On] is selected, select the Custom Box in which the copy is to be stored.

If a password entry screen for the Custom Box appears, enter the password.

You can view information on the selected Custom Box by selecting [Detail].

FAX TX Report

You can check whether FAX was transmitted properly by printing the report after transmission.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Does not print reports.</td>
</tr>
<tr>
<td>On</td>
<td>Prints reports.</td>
</tr>
<tr>
<td>Error Only</td>
<td>Prints reports only if an error occurs.</td>
</tr>
</tbody>
</table>

**NOTE**

This setting is displayed if FAX TX Result Reports is set to [Specify Each Job].

[Send Result Reports (page 7-7)]
Sending Faxes > Manual Send

Manual Send

This method allows you to send originals by pressing the [Start] key after confirming that the telephone line has connected to the receiving system.

NOTE
Connecting a telephone set (commercially available product) to this machine enables you to talk with the person at the receiving system before sending originals.

1 Select [FAX] on the Home screen.

2 Place the originals.

3 Select [On Hook].

4 Use the numeric keys to enter the number of the receiving system.

   NOTE
   To cancel the operation, select [Line Off].

5 Press the [Start] key.

When you hear the fax tone, the telephone line has connected to the receiving system. Press the [Start] key. Transmission begins.
Standby Transmission

During a communication, you can scan originals and schedule a next transmission. When the first communication is completed, the machine automatically starts the scheduled next transmission. When using standby transmission, you do not need to wait when a communication has prolonged due to broadcast transmission.

NOTE
Together with delayed transmission and interrupt send, up to 210 transmissions can be scheduled. You can use the broadcast transmission function.

1 Select [FAX] on the Home screen.

2 Place the originals.

3 Select the destination, and set transmitting functions if you want to use any.

4 Press the [Start] key.
   Scanning of the originals starts, and the next transmission is scheduled.

   NOTE
   When [On] is selected in [Dest. Check before Send], a destination confirmation screen is displayed when you press the [Start] key.
   ➡️ Confirmation Screen of Destinations (page 7-13)

5 When the communication is completed, the scheduled transmission will begin.
Interrupt Send

During communication, when you scan originals by selecting direct transmission, you can use interrupt send. Even when the communication is prolonged due to broadcast transmission or a next transmission being scheduled, the machine will first send originals for which interrupt send has been set.

NOTE
When the total number of standby transmissions and delayed transmissions has already reached 210, you cannot use interrupt send.

1 Select [FAX] on the Home screen.

2 Load the originals to be sent using Interrupt Send.

3 Select [Direct].
   For operation of direct transmission, refer to the following:
   ➤ FAX Direct Transmission (page 3-28)

4 Set the destination, and press the [Start] key.
   The originals are left in queue, and the transmission will start when transmission becomes possible.

   NOTE
   When [On] is selected in [Dest. Check before Send], a destination confirmation screen is displayed when you press the [Start] key.
   ➤ Confirmation Screen of Destinations (page 7-13)
   To cancel transmission while waiting for interrupt send, select the [Stop] key on the operation panel or [Cancel] on the touch panel.
   ➤ Cancelling Direct Transmission (page 3-28)

5 When the interrupt send is completed, the waiting communication and standby transmission will automatically resume.
Using chain dial

Chain dial is a function that allows you to dial by linking fax numbers of the receiving systems with a chain number created with a number common to several destinations. By setting multiple phone numbers from several telephone companies to a chain number, you can later choose the one that costs the least to send the fax to a remote or international destination.

NOTE
It is convenient to register chain numbers that are used frequently to the Address Book or One Touch Key.

For registration to the Address Book, refer to the following:
- Adding a Destination (Address Book) (page 2-15)
For registration to One Touch Key, refer to the following:
- Adding a Destination on One Touch Key (page 2-24)

As an example, when using '212' as the chain number

1 **Select the chain dial number**
To use a One Touch Key, select the destination in which "212" is registered.

   **NOTE**
   To use the Address Book, select the destination in which "212" is registered as explained in Choosing from the Address Book.
   ➤ Choosing from the Address Book (page 3-9)

   To enter using the numeric keys, enter "212".

2 **Select [Chain].**

3 **Enter the fax number to be added to the chain number.**

   **Select fax number from the Address Book**
   1 Select [Address Book].
   Multiple destinations can be selected.
   2 When [OK] is selected, "212" is automatically added to all destinations.
   For the procedure for selecting a destination in the address book, refer to the following:
   ➤ Choosing from the Address Book (page 3-9)

   **Select fax number from One Touch Key**
   1 Select [One Touch].
   2 When [OK] is selected, "212" is automatically added.
Use the numeric keys to enter a fax number

1. Enter the fax number.

2. Select [OK].
   When [OK] is selected, “212” is automatically added.

**NOTE**
When [On] is selected in [Entry Check for New Dest.], a confirmation screen is displayed for the entered FAX number. Re-enter the same FAX number and select [OK].

Machine’s Operation Guide
Using Program

A destination, transmission time, and other transmission settings can be registered as a program. After a program has been registered, it can be opened by simply selecting it from the Program screen. For the procedure for registering a program, refer to the following:

Machine’s Operation Guide

1 Recall the program.

1 Select [Program] in the Home screen, or the key of the registered program.

Selecting the key of the registered program will recall the program. If you selected [Program], proceed to step 1-2.

2 Select the key for the program number you want to recall.

Select [No.] or the Quick No. Search key on the numeric keypad to enter the program number (01 to 50) directly for recalling.

NOTE
If the program cannot be recalled, the Document Box or the form overlay specified in the program might have been deleted. Check the Document Box.

2 Execute the program.

Place the originals > [Start] key

NOTE
[Program] can be pressed in each function to call up the program registered for the function.
4 Receiving Faxes

This chapter explains the following topics:

FAX Reception ........................................................................................................................................ 4-2

Duplex Printing ....................................................................................................................................... 4-7
2 in 1 Print ............................................................................................................................................... 4-8
FAX Reception

When using this machine as a FAX-dedicated machine that does not receive telephone calls, set the machine to automatic reception. No special operation is required when receiving faxes.

Reception Method

The methods for receiving faxes on the machine are shown below.

- Auto (Normal)
- Auto (FAX/TEL) (Refer to 5-39.)
- Auto (Answering machine) (Refer to 5-41.)
- Manual (Refer to 4-4.)
- Auto (DRD) (Available for some countries.) (Refer to 5-43.)

Set the Reception Method

1. Display the screen.
   [System Menu/Counter] key > [FAX] > "Reception" [Next] > "RX Setting" [Change]

2. Select the reception method.
   Select the reception method > [OK]
   For Automatic Reception, select [Auto (Normal)].
Automatic Reception

Flow of automatic reception

1 Reception Starts

When a fax comes in, the [Processing] indicator blinks and reception automatically begins.

NOTE
When a telephone (commercially available product) is connected to the machine, reception starts after the telephone rings.
You can change the number of times the ringing tone rings.

Memory Reception
When the machine cannot print a fax due to paper running out or a paper jams, it temporarily stores originals that have been sent in the image memory. When the machine returns to the printable state, printing starts.
The number of pages that can be stored depends on the pages. As a general guideline, about 7,000 or more A4 size pages at normal resolution can be stored.
During memory reception, FAX Reception Printing Jobs are displayed on Printing Jobs of the Status screen. To print the received originals, supply paper or remove jammed paper.
For the Status screen, refer to the following:

Machine’s Operation Guide

2 Reception Print
Received faxes are output to the inner tray with the printed side facing down.

Canceling reception (Disconnection of communication)
When you cancel receiving by disconnecting the telephone line during communication, use the following procedure.

1 Select the [Status/Job Cancel] key.

2 Disconnection of communication.

[Device/Communicate] > “FAX Port 1” or “FAX Port 2” [Line Off]
When communication is disconnected, reception stops.
Manual Reception

This method allows you to receive faxes by selecting [Manual RX] after confirming that the telephone line has connected to the sending system.

NOTE
To use Manual Reception, you need to change the receiving mode to Manual Reception. To change to manual mode, refer to the following:

Reception (page 8-12)

Connecting a telephone set (commercially available product) to this machine enables you to receive originals after talking to the person at the sending system.

Manual Reception (page 5-46)

Flow of manual reception

1. The machine receives a call.
   When the machine receives a call, it rings.

3. Select [On Hook].
   Select [On Hook] to establish the connection.

4. Select [Manual RX].
   Reception will start.
## Fax reception functions

The reception method and fax printing method can be set.

Media Type for Print Output

Specify the paper type to be used for print output of the received fax.

| Supported paper types | All Media Types, Plain, Rough, Vellum, Labels, Recycled, Bond, Cardstock, Color, Envelope, Thick, Coated, High Quality, Custom 1-8 |

For more information about configuring settings, refer to the following:
➤ Media Type (page 8-12)

Setting the cassette for the print output of received faxes

By specifying the media type, faxes can be received on the corresponding cassette.

1 Display the screen.
[System Menu/Counter] key > [Cassette/MP Tray Settings] > "Cassette1-5" or "MP Tray Setting" [Next]
Select the cassette that you want to use for fax reception.

2 Selecting the paper size.

1 Select "Paper Size" [Change].

2 Inch models: [Auto] > [Inch]
Metric models: [Auto] > [Metric]

3 Select [OK].

3 Selecting the paper type.

1 Select "Media Type" [Change].

2 Select the paper type.

3 Select [OK].

4 Set the paper type.

Configure paper settings for fax reception. When selecting the paper type, select the same paper type as you selected in step 3.
For more information about configuring settings, refer to the following:
➤ Media Type (page 8-12)
**Multipurpose Tray**

You can select whether to use the MP tray paper when printing out the received fax.

<table>
<thead>
<tr>
<th>On</th>
<th>Use the MP tray paper.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Do not use the MP tray paper.</td>
</tr>
</tbody>
</table>

For more information about configuring settings, refer to the following:

* Multipurpose Tray (page 8-12)

**Reduced RX Size**

When the reception size is larger than the paper size, you can reduce the print size.

<table>
<thead>
<tr>
<th>On</th>
<th>Print the received data at 100% of the original size by dividing it into several sheets of paper.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Print the received data by reducing the original size according to the paper size.</td>
</tr>
</tbody>
</table>

For more information about configuring settings, refer to the following:

* Reduced RX Size (page 8-12)

**Reception Date/Time**

Reception Date/Time function adds the reception date/time, sender information and number of pages on the top of each page when the received fax is printed out. It is useful for confirming the time of reception if the fax is from a different time zone.

**NOTE**

When the received fax data is forwarded after retrieving it from memory, the reception date/time is not added to the forwarded data. When the received data is printed on divided pages, the reception date/time is printed on the first page only. It is not printed on the pages that follow.

<table>
<thead>
<tr>
<th>On</th>
<th>Print the reception date/time.</th>

Memory Forwarding

When you have received a fax or i-FAX, you can forward the received image to other faxes, computers, and FAX Boxes or specify a number of copies.

Type of Forwarding Destination and Requirements for Forwarding

You can set forwarding destinations and requirements for forwarding.

Type of Forwarding Destination

You can forward the received fax to other fax machines or FAX Boxes, send it as an i-FAX or E-mail attachment or transfer it to a folder (SMB or FTP).

Requirements for Forwarding

**IMPORTANT**
A fax or i-FAX that meets one of the specified forwarding requirements will be forwarded to one destination. If the fax meets multiple forwarding requirements, forwarding takes place based on the order of priority of the requirements.

The forwarding requirements are shown in 1 to 4 below. To change the order of priority of the forwarding requirements, refer to the following:

- Raising the Priority of Requirements for Forwarding (page 5-10)

The forwarding requirements are as follows:

1. Sub address
2. Sender fax number
3. Port (when 2 optional FAX Kits (Dual FAX option) are installed)
4. Recipient's address (i-FAX)

By using the memory forwarding function, you can perform the following communication.
Sub address confidential delivery
You can store the received originals in the FAX Box registered in advance without printing them, and output the originals without anyone seeing them.

➤ Sub address confidential delivery (page 5-26)

Sub address relay broadcast communication
Received originals are forwarded to multiple fax machines. By setting a sub address as the forwarding requirement, you can restrict relay broadcasting to a specific communication.

NOTE
When forwarding is used, you can select whether to print or not to print the received originals. Also, you can specify a number of copies when printing.

➤ Print Setting (page 5-14)

➤ Sub address relay broadcast communication (page 5-27)
Forward Settings

You can select whether all received documents are forwarded, or only documents that meet the conditions. The table below lists the items to be set.

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
<th>Reference Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Do not perform condition-based reception/forwarding. Received faxes are printed on paper.</td>
<td>-</td>
</tr>
<tr>
<td>Use Rule for Specific RX</td>
<td>Forward without specifying conditions. Received faxes are all handled in the same way.</td>
<td>5-4</td>
</tr>
<tr>
<td>Use Rule for All RX</td>
<td>Forward based on set conditions.</td>
<td>5-5</td>
</tr>
</tbody>
</table>

**Forward all received documents (Use Rule for All Receptions)**

By applying the requirements to all receptions, you can have all faxes that you receive be printed or forwarded based on the requirements.

To use requirements for all receptions, use the following procedure.

1. **Display the screen.**
   
   [System Menu/Counter] key > [FAX] > "RX/Forward Rules" [Next] > [Use Rule for All RX]

2. **Configure the Forwarding Destination.**
   
   1. "Forward Setting" [Next] > "Forwarding" [Change]
   2. [On] or [Off] > [OK]
   3. Select "Forward Destination" [Change].
   4. Select the other party by selecting one of the following keys > [OK] > [OK]

   **NOTE**
   
   You can register multiple destinations. By setting a group as the destination, you can specify up to 500 recipients.

   - E-mail Addr Entry
   - Address Book

**NOTE**

To register setting by each reception requirement, refer to the following:

- Forward only received documents that match the conditions (Use Rule for Specific RX) (page 5-5)

To change the entry contents, follow the same operation.

When using requirements for all receptions, received documents can not be stored in the FAX Box.
Using Convenient Fax Functions > Forward Settings

Configure the Forwarding Detail Settings.

1. You can change the following settings as necessary, and then select [OK].
   - File format setting
   - E-mail Subject Add. Info setting
   - FTP Encrypted TX setting
   - File Separation
     
     Forwarding Detail Settings (page 5-11)

2. You can change the following settings, and then select [OK].
   - Number of Copies
   - Enable time setting
   - File name registration
     
     Forwarding Detail Settings (page 5-11)

Forward only received documents that match the conditions (Use Rule for Specific RX)

To register settings by each reception requirement, follow the steps below.

Up to 100 requirements can be registered.

1. Display the screen.
   [System Menu/Counter] key > [FAX] > "RX/Forward Rules" [Next] > [Use Rule for Specific RX]

2. Configure the Requirements for Forwarding.
   1. [Add] > "Rule Number" [Change]
2 Select [+] or [-] or use the numeric keys to enter the requirement number (001 to 100) > [OK]

3 Select "Rule Name" [Change].

4 Enter the requirement name > [OK]

**NOTE**
Up to 32 characters can be entered for the requirement name.
For details on character entry, refer to the following:
 Character Entry Method (page 12-2)

5 Select "Rule" [Change].

6 To forward fax reception, select [FAX] or [i-FAX] > [Next].

7 Register the requirements > [OK]

**When FAX was selected in step 6.**

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Registration method</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sub Address</td>
<td>Select [Sub Address] and enter the sub address using the numeric keys. You can use up to 20 digits including the numbers from 0 to 9, ‘ ‘(space), ‘#’ and ‘*’ characters to enter a sub address.</td>
</tr>
<tr>
<td>Sender FAX Number</td>
<td>Select [Sender FAX Number] and enter the sender’s fax number using the numeric keys. You can enter up to 20 characters.</td>
</tr>
<tr>
<td>Port</td>
<td>Select [Port] and select [Port 1] or [Port 2]. If the port is selected, fax box forwarding will not be possible. This setting only appears when 2 optional FAX Kits (Dual FAX option) are installed.</td>
</tr>
</tbody>
</table>

**When i-FAX was selected in step 6.**

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Registration method</th>
</tr>
</thead>
<tbody>
<tr>
<td>i-FAX Address</td>
<td>Select [i-FAX Address]. Enter the destination Internet FAX address. You can enter up to 128 characters.</td>
</tr>
</tbody>
</table>

**NOTE**
When setting a forwarding condition by selecting a sender’s FAX number (a local FAX information entry of the destination machine) but leaving blank to the sender’s FAX number, you can forward a FAX that is received from a sender whose number is not registered in the sender’s FAX number entries.

When you set the sender fax number as a forwarding requirement, select the search requirement from Search by pull-down menu.

• Same as
• Starts with
• Ends with
• Includes
3 Configure the Forwarding Destination.

1 "Forward Setting" [Next] > "Forwarding" [Change]

2 [On] or [Off] > [OK]

3 Select "Forward Destination" [Change].

4 Select the other party by selecting one of the following keys > [OK] > [OK]

<table>
<thead>
<tr>
<th>Key</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Address Book</td>
<td>Select the destination registered in the Address Book or Ext Address Book</td>
</tr>
<tr>
<td>E-mail Addr Entry</td>
<td>Forward originals in e-mail transmission. Enter the e-mail address of the other party to which you will forward the received originals.</td>
</tr>
<tr>
<td>Folder Path Entry</td>
<td>Forward originals with folder (SMB) transmission or folder (FTP) transmission. Enter the Host Name, Path, Login User Name, and Login Password of the other party to which you will forward the received originals.</td>
</tr>
<tr>
<td>FAX No. Entry</td>
<td>Forward originals to another fax. Enter the recipient’s fax number using the numeric keys and set the transmission details.</td>
</tr>
<tr>
<td>i-FAX Addr Entry</td>
<td>Forward originals using i-FAX. Enter the Internet FAX address of the recipient and set the conditions for the destination machine.</td>
</tr>
</tbody>
</table>

**NOTE**
To edit a registered destination, select the destination to be edited from the list, select [Detail/Edit] and edit the information.
To remove a registered destination, select the destination to be removed from the list and select [Delete].

4 Configure the Forwarding Detail Settings.

1 You can change the following settings as necessary, and then select [OK].
   - File format
   - E-mail Subject Add. Info
   - FTP Encrypted TX
   - File Separation

   ➤ Forwarding Detail Settings (page 5-11)

2 Select "Storing in FAX Box" [Change].

**NOTE**
If the forwarding conditions are as follows, Save to FAX Box cannot be configured.
   - If "Port" is configured.
   - Save to FAX Box cannot be configured for "Others" of a forwarding condition.
3 To store the originals in the FAX Box, select [On]. If you do not want to store the originals in the FAX Box, select [Off], select [OK] and proceed to step 4-5.

NOTE
To set the FAX Box as the Forward Destination, register the FAX Box in advance.

FAX Box Function (page 5-17)

4 Select the FAX Box to be used to store the originals and select [OK]. If you set the password to FAX Box, enter the password and select [OK].

5 You can change the following settings, and then select [Register].
   • Number of Copies
   • Enable time setting
   • File name registration

Forwarding Detail Settings (page 5-11)
To register another forwarding settings, repeat steps 2-1 to 4-5.

6 Select the checkbox beside the forwarding settings to be enabled from the list. The checkbox beside the forwarding setting to be enabled is checked.

NOTE
To disable the setting, select the checkbox to delete the checkmark.

7 Select [OK]. The setting is saved by each requirement.

Forward received documents that do not match the conditions
To forward received documents that do not match the conditions, follow the procedure below.

1 Follow steps 1 to 4-5 of Forward only received documents that match the conditions (Use Rule for Specific RX).

   Forward only received documents that match the conditions (Use Rule for Specific RX) (page 5-5)

2 Change the Forwarding Settings.
   1 [others] > [Detail]
   2 Change the Forwarding Settings > [Save]

NOTE
If [others] is not selected, received faxes that do not meet the conditions will be printed. Save to FAX Box cannot be set in [others] settings.

3 Register the Forwarding Settings.
   1 Select the checkbox beside the forwarding settings to be enabled from the list. The checkbox beside the forwarding setting to be enabled is checked.
NOTE
To disable the setting, select the checkbox to delete the checkmark.

2 Select [OK].

Cancelling Memory Forwarding

To cancel memory forwarding, break the connection and then cancel forwarding.

► Cancelling Transmission (Disconnection of Communication) (page 3-6)
Changing/Deleting Requirements for Forwarding

To change or delete the requirements for forwarding, follow the steps below.

1. **Display the screen.**
   Follow steps 1 of "Use Rule for Specific RX" on page 4-21.

   ➤ Forward only received documents that match the conditions (Use Rule for Specific RX)

2. **Configure the function.**
   1. Select the requirement name to be deleted or changed.
      To delete the requirement name, go to the next step. To change the requirement name, go to step 3.
   2. Select [Delete].
      When the confirmation screen is displayed, select [Yes] and go to step 5.
   3. Select [Detail].
   4. Refer to steps 2 to 4 of "Use Rule for Specific RX" to change the settings.
      ➤ Forward only received documents that match the conditions (Use Rule for Specific RX)
   5. When the deletion or change is completed, Select [OK].

Raising the Priority of Requirements for Forwarding

To raise the priority of the requirements for forwarding, follow the steps below.

1. **Display the screen.**
   Follow steps 1 of "Use Rule for Specific RX" on page 4-21.

   ➤ Forward only received documents that match the conditions (Use Rule for Specific RX)

2. **Configure the function.**
   1. Select the requirement name to be reprioritized.
   2. Select [Raise Priority].
      The priority of the selected requirement is raised.

Cancelling the Setting of RX/Forward Rules

To cancel the memory forwarding, follow the steps below.

1. **Display the screen.**
   [System Menu/Counter] key > [FAX] > "RX/Forward Rules" [Next]

2. **Configure the function.**
   [Off] > [OK]
Forwarding Detail Settings

Forwarding Time Setting
Register the start time and end time between which forwarding is enabled.

1 Display the screen.

   Use Rule for All Receptions
   1 Follow steps 1 of Forward all received documents (Use Rule for All Receptions).

     Forward all received documents (Use Rule for All Receptions) (page 5-4)
   2 Select "Schedule" [Change].

   Use Rule for Specific RX
   1 Follow steps 1 of Forward only received documents that match the conditions (Use Rule for Specific RX), select the rule, and select [Detail].

     Forward only received documents that match the conditions (Use Rule for Specific RX) (page 5-5)
   2 Select "Schedule" [Change].

2 Configure the function.

   1 Select [All Day] or [Preset Time]. If Preset Time is selected, enter the [Start Time] and [End Time].

      NOTE
      Enter the time on the 24 hours system.
   2 Select [OK].

File Format Setting
If you are sending the file as an E-mail attachment or transferring it to a folder (SMB or FTP), select PDF, TIFF, XPS, or OpenXPS as the file format.

1 Display the screen.

   Use Rule for All Receptions
   1 Follow steps 1 of Forward all received documents (Use Rule for All Receptions), and select [Next] of "Forward Setting".

     Forward all received documents (Use Rule for All Receptions) (page 5-4)
   2 Select "File Format" [Change].

   Use Rule for Specific RX
   1 Follow steps 1 of Forward only received documents that match the conditions (Use Rule for Specific RX), select the rule, and select [Detail].

     Forward only received documents that match the conditions (Use Rule for Specific RX) (page 5-5)
Using Convenient Fax Functions > Forwarding Detail Settings

2 "Forward Setting" [Next] > "File Format" [Change]

Configure the function.

[PDF], [TIFF], [XPS] or [OpenXPS] > [OK]

NOTE
If you have selected [PDF] for file format, PDF Encryption functions are available.

Machine’s Operation Guide

File Separation

When sending by e-mail transmission, folder (SMB) transmission, or folder (FTP) transmission, specify whether File Separation is performed.

1 Display the screen.

Use Rule for All Receptions

1 Follow steps 1 of Forward all received documents (Use Rule for All Receptions), and select "Forward Setting" [Next].

Forward all received documents (Use Rule for All Receptions) (page 5-4)

2 Select "File Separation" [Change].

Use Rule for Specific RX

1 Follow steps 1 of Forward only received documents that match the conditions (Use Rule for Specific RX), select the rule, and select [Detail].

Forward only received documents that match the conditions (Use Rule for Specific RX) (page 5-5)

2 "Forward Setting" [Next] > "File Separation" [Change]

2 Configure the function.

[Each Page] or [Off] > [OK]

To create one file per page, select [Each Page].

E-mail Subject Add. Info. Setting

Specify whether any information will be added to the subject of the E-mail. When adding information, you can select either Sender Name or Sender.

1 Display the screen.

Use Rule for All Receptions

1 Follow steps 1 of Forward all received documents (Use Rule for All Receptions), and select "Forward Setting" [Next].

Forward all received documents (Use Rule for All Receptions) (page 5-4)

2 Select "E-mail Subject Add. Info" [Change].
**Use Rule for Specific RX**

1. Follow steps 1 of Forward only received documents that match the conditions (Use Rule for Specific RX), select the rule, and select [Detail].

   ➤ Forward only received documents that match the conditions (Use Rule for Specific RX) (page 5-5)

2. "Forward Setting" [Next] > "E-mail Subject Add. Info" [Change]

2. **Configure the function.**

   [Sender Name], [Sender FAX No./Address], or [Off] > [OK]

**FTP Encrypted TX Setting**

Specify whether to use FTP encryption when you send data.

**NOTE**

➤ Machine’s Operation Guide

1. **Display the screen.**

**Use Rule for All Receptions**

1. Follow steps 1 of Forward all received documents (Use Rule for All Receptions), and select "Forward Setting" [Next].

   ➤ Forward all received documents (Use Rule for All Receptions) (page 5-4)

2. Select "FTP Encrypted TX" [Change].

**Use Rule for Specific RX**

1. Follow steps 1 of Forward only received documents that match the conditions (Use Rule for Specific RX), select the rule, and select [Detail].

   ➤ Forward only received documents that match the conditions (Use Rule for Specific RX) (page 5-5)

2. "Forward Setting" [Next] > "FTP Encrypted TX" [Change]

2. **Configure the function.**

   Select [On] or [Off] > [OK]
Print Setting

You can set whether the machine should print received originals when forwarding them.

1 Display the screen.

Use Rule for All Receptions

1 Follow steps 1 of Forward all received documents (Use Rule for All Receptions).

   ➤ Forward all received documents (Use Rule for All Receptions) (page 5-4)

2 Select "Print" [Change].

Use Rule for Specific RX

1 Follow steps 1 of Forward only received documents that match the conditions (Use Rule for Specific RX), select the rule, and select [Detail].

   ➤ Forward only received documents that match the conditions (Use Rule for Specific RX) (page 5-5)

2 Select "Print" [Change].

2 Configure the function.

[On] or [Off] > [OK]

If you selected [On], select [+]/[-] or numeric keys to set the number of copies.
File Name Registration

You can set the file name to be created when forwarding. You can append information such as the date/time and the job number or fax number (address for an i-FAX).

1 Display the screen.

   Use Rule for All Receptions

   1 Follow steps 1 of Forward all received documents (Use Rule for All Receptions).

      ➤ Forward all received documents (Use Rule for All Receptions) (page 5-4)

   2 Select "File Name" [Change].

   Use Rule for Specific RX

   1 Follow steps 1 of Forward only received documents that match the conditions (Use Rule for Specific RX), select the rule, and select [Detail].

      ➤ Forward only received documents that match the conditions (Use Rule for Specific RX) (page 5-5)

   2 Select "File Name" [Change].

2 Configure the function.

   1 [File Name] > Enter the file name > [Save]

   > NOTE
   For details on character entry, refer to the following:

      ➤ Character Entry Method (page 12-2)

   2 To insert additional information into the file name, select [Job No.], [Date and Time], [Add No./Addr to Front] or [Add No./Addr to Back].

   > NOTE
   Please note that when you have not add any additional information, file names become the same, and, therefore, old files are overwritten when received originals are forwarded with folder (SMB) transmission and folder (FTP) transmission.

   File name sample
   Example: doc00352720140826181723.pdf
   doc (file name) + 6-digit job number + year/month/day/hour/minute/second +file format (default setting is .pdf)
Using Convenient Fax Functions > Forwarding Detail Settings

Settings for Forwarding from Command Center RX (Forward Settings)

You can use Command Center RX on a computer connected to the network to specify the forwarding settings on this machine.

For information on the network settings, refer to the followings:

➤ Machine’s Operation Guide

Accessing Command Center RX

1 Display Command Center RX.

1 Open the web browser.

2 In the Address or Location bar, enter the machine’s IP address as the URL, e.g. 10.180.81.3/.
   The web page displays basic information about the machine and Command Center RX as well as the current status of the machine.

2 Select settings in Command Center RX.

Select a category from the navigation bar on the left to view and set values for that particular category.

If administrator privileges have been enabled on Command Center RX, remember to enter the correct user name and password when trying to access the relevant screens.

➤ Command Center RX User Guide
FAX Box Function

FAX Box

A FAX Box is a box for storing received originals on the machine to which the FAX System is to be installed. Using the memory forwarding function, you can store received originals in a personal FAX Box.

For the method for using a FAX Box, see the next section.
- Registering a FAX Box ➤ page 5-18
- Changing FAX Box ➤ page 5-19
- Deleting FAX Box ➤ page 5-19

For the method for manipulating a received fax stored in a FAX Box, see the next section.
- Printing Originals from a FAX Box ➤ page 5-21
- Checking Details ➤ page 5-22
- Deleting Originals after Printing from a FAX Box ➤ page 5-23
- Deleting Originals from a FAX Box ➤ page 5-23
- Printing a FAX Box List ➤ page 5-24

For the method for transmitting to a FAX Box, see the next section.
- Sub Address Transmission ➤ page 5-25

For the method for receiving to a FAX Box, see the next section.
- Sub Address Reception ➤ page 5-26

Sub Address Communication

Sub address communication is communication in which data is sent and received with sub addresses and passwords attached in conformance with the ITU-T (International Telecommunication Union) recommendations. Sub addresses enable communication modes with third-party machines that were previously only possible between our brand machines. These include confidential delivery (sending originals to an original delivery box set up in the receiving system) and polling communication (reception of documents from a source machine that is controlled from the receiving machine). Using sub address communication and the memory forwarding function on this machine also allows advanced communication functions such as storing received originals in FAX Boxes and forwarding originals to other fax machines.

Sub Address

With the machine, sub address and sub address passwords are called sub address.

Sub Address

Use the numbers from 0 to 9, ‘ (space)’, and ‘#’ and ‘*’ characters to enter a sub address of up to 20 digits. When the machine receives originals, the sub address is used as the forward requirement for memory forwarding.
Sub Address Password

Use the numbers from 0 to 9, alphabets, ‘(space)’, and ‘#’ and ‘*’ characters to enter a sub address password of up to 20 digits. When the machine receives originals, a sub address password is not used.

For the procedure for setting a sub address, refer to the following:

- Sub Address Transmission (page 5-25)
- Sub Address Reception (page 5-26)

Registering a FAX Box

Up to 100 FAX Boxes can be registered.

NOTE

If user login administration is enabled, you can only edit destinations in the Address Book by logging in with administrator privileges.

FAX Boxes can also be registered in the system menu.

1 Display the screen.

[FAX Box] on the Home screen > [Add/Edit Box]

2 Configure the function.

1 Select [Add].

2 Enter the information and then select [OK].

The table below lists the items to be set.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Box No.</td>
<td>Enter the box number by selecting [+], [-] or number keys. The box number can be from 0001 to 1000. A Custom Box should have a unique number. If you enter 0000, the smallest number available will be automatically assigned.</td>
</tr>
<tr>
<td>Owner*1</td>
<td>Set the owner of the box. Select the owner from the user list that appears.</td>
</tr>
<tr>
<td>Box Name</td>
<td>Enter a box name consisting of up to 32 characters. Refer to the following for details on entering characters.</td>
</tr>
<tr>
<td></td>
<td>[Character Entry Method (page 12-2)]</td>
</tr>
<tr>
<td>Box Password</td>
<td>User access to the box can be restricted by specifying a password to protect the box. Entering a password is not mandatory. Enter the same password of up to 16 characters in both [Password] and [Confirm Password].</td>
</tr>
<tr>
<td>Permission*1</td>
<td>Select whether to share the box.</td>
</tr>
<tr>
<td>Delete after Printed</td>
<td>Automatically delete a document from the box once printing is complete. To delete the document, select [On]. To retain the document, select [Off].</td>
</tr>
</tbody>
</table>

*1 Displayed when the user login administration is enabled.

3 Check the details you have entered and then select [Save].

A box is created.
Changing FAX Box

NOTE
FAX Boxes can also be changed in the system menu.

**1** Display the screen.

[FAX Box] on the Home screen > [Add/Edit Box]

**2** Changing

Select the box that you want to change > [Detail/Edit]

Change the settings.

The table below lists the items to be set.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Box No.</td>
<td>Enter the box number by selecting [+], [-] or number keys. The box number can be from 0001 to 1000. A Custom Box should have a unique number. If you enter 0000, the smallest number available will be automatically assigned.</td>
</tr>
<tr>
<td>Owner*1</td>
<td>Set the owner of the box. Select the owner from the user list that appears.</td>
</tr>
<tr>
<td>Box Name</td>
<td>Enter a box name consisting of up to 32 characters. Refer to the following for details on entering characters.</td>
</tr>
<tr>
<td>Box Password</td>
<td>User access to the box can be restricted by specifying a password to protect the box. Entering a password is not mandatory. Enter the same password of up to 16 characters in both [Password] and [Confirm Password].</td>
</tr>
<tr>
<td>Permission*1</td>
<td>Select whether to share the box.</td>
</tr>
<tr>
<td>Delete after Printed</td>
<td>Automatically delete a document from the box once printing is complete. To delete the document, select [On]. To retain the document, select [Off].</td>
</tr>
</tbody>
</table>

*1 Displayed when the user login administration is enabled.

Deleting FAX Box

NOTE
FAX Boxes can also be deleted in the system menu.

**1** Display the screen.

[FAX Box] on the Home screen > [Add/Edit Box]

**2** Deleting

1 Select the box that you want to delete.
2 [Delete] > [Yes]
The box is deleted.
Printing Originals from a FAX Box

To print the originals that have been sent to a FAX Box, use the following operation.

1. Select [FAX Box] on the Home screen.

2. Selecting the Originals.
   1. Select the box containing the document you want to print > [Open]

   **NOTE**
   When the password is set to a FAX Box, you need to enter the password in the following situations:
   - If user login administration is disabled
   - If user login administration is enabled but the FAX Box has been selected by another user when you login with user privileges

   2. Select the document you want to print.
      The selected originals are check-marked.

   **NOTE**
   To cancel the selection, select the checkbox and delete the checkmark.
   When [ ] is selected in the fax box screen, a thumbnail of the original image appears.
   To check the image of the originals, refer to the preview.
   - Previewing Images (page 5-22)
   For information on working with lists in FAX Boxes, refer to the following:
   - Machine's Operation Guide
   From a FAX Box, only printing is available. Sending cannot be done.

3. Select [Print].

3. Print
   1. Select whether the originals are to be deleted from the FAX Box after printing is completed.
      To delete the data, select [On].

   2. Select [Start Print].
      The print starts.
Checking Details
You can use the procedure below to check the details of documents forwarded to a FAX Box.

1. Select [FAX Box] on the Home screen.

2. Selecting the Originals.
   1. Select the box containing the document you want to check > [Open]
   2. Select the document whose details you want to check > [Detail]
      The details of the selected document are displayed.
      Select "File Name" [Change] to rename the file.

   ➤ Character Entry Method (page 12-2)

Previewing Images
You can use the procedure below to preview an image of an original forwarded to a FAX Box on the touch panel.

1. Select [FAX Box] on the Home screen.

2. Selecting the Originals.
   1. Select the box containing the document you want to check > [Open]
   2. Selecting the Originals > [Preview]
      The preview screen appears

Using the Preview screen

1. Zoom in.
2. Zoom out.
3. When you have zoomed in, you can use these keys to move the displayed area.
4. In multiple-page documents, you can use these buttons to change pages.
5. In multiple-page documents, you can change pages by entering the desired page number.

NOTE
The preview display can be controlled by moving your finger(s) on the touch panel.

➤ Previewing Images (page 2-6)
Deleting Originals after Printing from a FAX Box

To automatically delete the originals printed from the FAX Box, use the following operation.

1. Select [FAX Box] on the Home screen.
2. Selecting the Originals.
   1. Select the box containing the document you want to print > [Open]
   2. Select the document you want to print.
   3. Select [Print].
3. Configure the function.
   Select [On].
4. Print.
   Select [Start Print].
   The original is deleted after printing.

Deleting Originals from a FAX Box

Use the procedure below to delete an original that you have forwarded to a FAX Box.

1. Select [FAX Box] on the Home screen.
2. Deleting
   1. Select the box containing the document you want to delete > [Open]
   2. Select the document you want to delete > [Delete] > [Yes]
      The original is deleted.
Printing a FAX Box List

You can print the FAX Box list in which the list of Box No.'s and Box names of the registered FAX Boxes are described. When there are originals in the FAX Boxes, the number of pages is displayed.

NOTE
The list can be printed when user login administration has been enabled and the machine is logged in with administrator privileges.

1 Display the screen.
   [System Menu/Counter] key > [Document Box/Removable Memory] > "FAX Box" [Next]

2 Print
   "FAX Box List" [Print] > [Yes]
   The list is printed.
Sub Address Transmission

To specify a FAX Box when sending a fax, follow the steps below.

**NOTE**
To use sub address transmission, check that a sub address and password have been set in the receiving system in advance.
Encrypted transmission cannot be used in sub address transmission.

For the setting method when the machine receives originals, refer to the following:

▶ FAX Box Function (page 5-17)

2. Place the originals.

3. Specifying destination.
   Use the numeric keys to enter the destination fax number.

   **NOTE**
   When a sub address has been registered to the destination of the Address Book, you can use the destination. When a sub address-registered destination in the Address Book is used for a One Touch Key, you can also use the One Touch Key.

4. Configure the function.
   1. [Detail] > “Sub Address” [Change] > [Sub Address]
   2. Enter the sub address using the numeric keys, and then enter the [OK] key.
      You can use up to 20 digits including the numbers from 0 to 9, ‘ ‘ (space), ‘#’ and ‘*’ characters to enter a sub address.
   3. Select [Password].
   4. Enter the sub address password using the numeric keys, and then enter the [OK] key.
      You can use up to 20 digits including the numbers from 0 to 9, ‘ ‘ (space), ‘#’ and ‘*’ characters to enter a sub address password.
   5. [OK] > [OK]

5. Send Start.
   Check the destination and press the [Start] key.

   **NOTE**
   When [On] is selected in [Dest. Check before Send], a destination confirmation screen is displayed when you press the [Start] key.

   ▶ Confirmation Screen of Destinations (page 7-13)
Sub Address Reception

To perform sub-address reception, you must inform the sending party of the machine's sub-address and password prior to transmission.

When sub-address reception is performed, the functions below can be used.

- Memory Forwarding ............................................................................................................ 5-2
- Sub address confidential delivery ............................................................................................ 5-26
- Sub address relay broadcast communication .................................................................................... 5-27
- Sub Address Bulletin Board Reception ......................................................................................... 5-31

Sub address confidential delivery

You can store the received originals in the FAX Box registered in advance without printing them, and output the originals without anyone seeing them.

Setting example

1. Register the FAX Box.
   ➤ Registering a FAX Box (page 5-18)
2. Perform sub address transmission.
3. Store originals in the FAX Box with memory forwarding.
4. Print originals from the FAX Box.
   ➤ Printing Originals from a FAX Box (page 5-21)
Sub address relay broadcast communication

Received originals are forwarded to multiple fax machines. By setting a sub address as the forwarding requirement, you can restrict relay broadcasting to a specific communication.

NOTE
When forwarding is used, you can select whether to print or not to print the received originals. Also, you can specify a number of copies when printing.

➤ Print Setting (page 5-14)

Setting example

1  Perform sub address transmission.
2  Use memory forwarding to forward received originals to multiple fax machines.
3  Each forwarding destination receives the fax.
Polling Communication

Polling communication is a communication mode in which the transmission of originals on the sending machine is controlled by the receiving machine. This allows the receiving machine to tailor the reception of originals to its own circumstances. This machine supports both polling transmission and polling reception.

**IMPORTANT**
Because the receiving machine dials the sending machine in polling communication, call charges are normally borne by the recipient.

Polling Transmission

Originals to be used in polling transmissions should be stored in a Polling box. When a polling request is received from the destination, the stored originals are sent automatically.

Once originals intended for polling transmission have been sent to the destination, they are automatically deleted. However, if you set Delete Transmitted File to [Off], the originals are stored in the Polling box until you delete them. You can use polling transmission with the same originals as many times as you wish.

✿ Deleting Originals After Polling Transmission (page 5-28)

**NOTE**
You can store up to 10 documents for polling transmission when a sub-address is not used. When a sub-address is used, up to 10 documents can be stored per sub-address.

You can also add to or overwrite originals up until a polling request arrives from the destination.

✿ Overwrite Setting (page 5-28)

Deleting Originals After Polling Transmission

Originals intended for polling transmission are automatically deleted after they have been sent to the destination. To allow polling transmission of the same original to multiple destinations, set this option to [Off].

1. **Display the screen.**
   
   [System Menu/Counter] key > [Document Box/Removable Memory] > "Polling Box" > [Change]

2. **Configure the function.**

   "Delete Transmitted File" [Change] > [On] or [Off] > [OK]

Overwrite Setting

To allow overwriting, set this option to [Permit].

Use the procedure below to overwrite the existing document if the same name is added to the new file. If this option is set to [Prohibit], the existing document will not be overwritten if the same file name is set.

1. **Display the screen.**

   [System Menu/Counter] key > [Document Box/Removable Memory] > "Polling Box" > [Change]

2. **Configure the function.**

   "Overwrite Setting" [Change] > [Permit] or [Prohibit] > [OK]
Using Polling Transmission

1. [FAX Box] on the Home screen > [Polling Box]

2. Place the originals.

3. Display the screen.
   Select [Store File].

4. Select the type of originals, scanning density, etc., as necessary.
   The table below lists the items to be set.

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Original Image</td>
<td>Select image quality.</td>
</tr>
<tr>
<td>Mixed Sized Originals*1</td>
<td>Allows you to use the document processor to load and store multiple originals of different sizes.</td>
</tr>
<tr>
<td>2-sided/Book Original*2</td>
<td>Select the type and binding of originals.</td>
</tr>
<tr>
<td>Original Orientation</td>
<td>To ensure that the originals are stored in the correct orientation, this indicates the orientation of the original document top edge. To use the following functions, select the orientation of the originals.</td>
</tr>
<tr>
<td></td>
<td>• 1-sided / 2-sided Selection</td>
</tr>
<tr>
<td></td>
<td>• Border Erase</td>
</tr>
<tr>
<td>Storing Size</td>
<td>Selects the storage size (the size of stored originals).</td>
</tr>
<tr>
<td>Density</td>
<td>Adjusts the density used for scanning originals.</td>
</tr>
<tr>
<td>Original Image</td>
<td>Select the image quality according to the original image type.</td>
</tr>
<tr>
<td>Scan Resolution</td>
<td>Chooses the level of detail used for scanning originals.</td>
</tr>
<tr>
<td>Zoom</td>
<td>Automatically enlarges or reduces scanned originals to match the storage size.</td>
</tr>
<tr>
<td>Centering</td>
<td>When you have scanned the original after specifying the original size and sending size, depending on these sizes, a margin is created at the bottom, left, or right side of paper. By using the centering, the image is placed with a margin equally created at each of the page Top/Bottom and Left/Right.</td>
</tr>
<tr>
<td>Border Erase</td>
<td>Scans originals with the black frame around the outside of the originals erased.</td>
</tr>
<tr>
<td>Continuous Scan</td>
<td>Allows you to divide originals that cannot be placed in the document processor at one time into multiple scans and then store the result as a single file. With this function, originals continue to be scanned until you select [Finish Scan].</td>
</tr>
<tr>
<td>Job Finish Notice</td>
<td>Sends a notice by an e-mail when a scanning is complete.</td>
</tr>
</tbody>
</table>
For each of the functions, refer to the following:

**Sending Faxes (page 3-1)**
Machine’s Operation Guide

### 5 Start storing.
Press the [Start] key. The originals are scanned and stored in the Polling box.

**NOTE**
You can see a preview of the image to be stored by selecting [Preview].

**Previewing Images (page 2-6)**

### Cancelling Polling Transmissions
To cancel a polling transmission, delete the polling transmission original saved in the polling box. For information on how to delete the saved original, refer to the following:

**Deleting Originals in a Polling Box (page 5-34)**
Polling Reception

This function automatically triggers transmission of originals stored on the sending machine when the receiving machine dials the sending machine’s number.

**NOTE**
By setting a group as the destination, you can receive originals from up to 500 contacts in a single operation. If you specified a destination for which encrypted communication is registered, encrypted communication is disabled for polling reception.

When 2 optional FAX Kits (Dual FAX option) are installed and a receive-only port is specified, communication is via the other port.

To use polling reception, you must first ensure that the sending machine is set up for polling transmission.

Using sub addresses at the same time allows the communication modes described below.

**Sub Address Bulletin Board Reception**

If the recipient’s machine has a sub address bulletin board function, you can use sub addresses to communicate with that machine even if it is a third-party machine. (On this machine, the sub address and sub address password.)

Sub Address:

3333

External FAX

**IMPORTANT**
The recipient’s machine must also be equipped with a sub address bulletin board function. Some fax machines cannot store originals and some do not support polling transmission. Check both the sending and receiving machines beforehand to ensure that they each have the required functionality.

Ask the recipient for the sub address and password that are registered in the recipient’s machine.

**NOTE**
For more information on sub addresses, refer to the following:

- Sub Address Communication (page 5-17)

For information on how to receive files using sub address bulletin board communication, refer to the following:

- Using Polling Reception with Sub Addresses (page 5-32)
Using Convenient Fax Functions > Polling Communication

Using Polling Reception

2. Turn on polling reception.
   
   [Advanced Setup] > [FAX Polling RX] > [On] > [OK]

3. Specifying destination.
   
   ➤ Methods For Entering the Destination (page 3-7)

4. Press the [Start] key.
   
   The operations for reception begin.

   ➤ NOTE
   
   When [On] is selected in [Dest. Check before Send], a destination confirmation screen is displayed when you press the [Start] key.
   
   ➤ Confirmation Screen of Destinations (page 7-13)

Using Polling Reception with Sub Addresses

For polling reception, enter the sub address (on this machine, sub address and sub address password) set at the sending machine. This communication is still possible when the other party is using a third-party machine provided it is equipped with the same type of sub address communication function.

2. Turn on polling reception.
   
   To turn on polling reception, refer to the following:
   
   ➤ Polling Reception (page 5-31)

3. Select the destination, and entering the sub address.
   
   For the procedure for setting a sub address, refer to the following:
   
   ➤ Sub Address Transmission (page 5-25)
   
   For the procedure for selecting a destination, refer to the following:
   
   ➤ Methods For Entering the Destination (page 3-7)

   ➤ NOTE
   
   You can select destinations using a combination of numeric keys input, One Touch Key selection and selection from the Address Book containing registered sub addresses.
4 Press the [Start] key.
   The operations for reception begin.

NOTE
When [On] is selected in [Dest. Check before Send], a destination confirmation screen is displayed when you press the [Start] key.
➤ Confirmation Screen of Destinations (page 7-13)

Printing from a Polling Box
Use this procedure to print an original stored in a Polling box.

1 [FAX Box] on the Home screen > [Polling Box]

2 Select the original.
   Select the document you want to print.
   The selected originals are check-marked.

NOTE
To cancel a selection, select the checkbox again so that it is no longer ticked.
To check the image of the originals, refer to the preview.
➤ Previewing Images (page 5-22)
For information on working with lists in a Polling box, refer to the following:
➤ Machine’s Operation Guide

3 Print.
   [Print] > [Yes]
   Printing starts.
Checking Details
Use this procedure to check the details of an original stored in a Polling box.

1 [FAX Box] on the Home screen > [Polling Box]

2 Select the original.
   1 Select the document you want to check.
   2 Select [Detail].
      The details of the selected document are displayed.
      Select "File Name" [Change] to rename the file.
      ➤ Character Entry Method (page 12-2)

Deleting Originals in a Polling Box
Use this procedure to delete an original stored in a Polling box.

1 [FAX Box] on the Home screen > [Polling Box]

2 To delete.
   1 Select the document you want to delete and select [Delete].
   2 Select [Yes].
      The original is deleted.

NOTE
If [Delete Transmitted File] is set to [On], originals are automatically deleted following polling transmitted.
➤ Deleting Originals After Polling Transmission (page 5-28)
Encryption

This method allows you to communicate with originals encrypted by the sending system. Therefore, even when a third party tries to view the originals in the middle of communication by some means, the third party is prevented from knowing the actual contents of the originals. The originals received are reverted to the originals as they were before transmission (decrypted) by the receiving system, and printed. This is an extremely effective communication method for sending confidential documents that are not to be opened by a third party.

**IMPORTANT**

In order to use encryption communication, the fax of the other party needs to be an our-brand system with the same type of encryption functions.

In encryption communication, in order to encrypt and decrypt originals, the sending and receiving systems must use the same 16-digit encryption key. When the encryption key differs between the sending system and the receiving system, the encryption cannot be conducted. Therefore, the sending system and the receiving system need to have the same encryption key and 2-digit key No. registered in advance.

Description of settings at sending and receiving systems

<table>
<thead>
<tr>
<th>Settings</th>
<th>Sending system</th>
<th>Receiving system</th>
<th>Reference page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Encryption Key No.</td>
<td>(A) 2 digits</td>
<td>(B) 2 digits</td>
<td>5-36</td>
</tr>
<tr>
<td>Encryption Key</td>
<td>(C) 16 digits</td>
<td>(C) 16 digits</td>
<td>5-36</td>
</tr>
<tr>
<td>Key No. of Address Book (or when the number is directly dialed)</td>
<td>(A) 2 digits</td>
<td>—</td>
<td>5-37</td>
</tr>
<tr>
<td>Receiving system encryption box number*1</td>
<td>(D) 4 digits</td>
<td>—</td>
<td>5-37</td>
</tr>
<tr>

<td>—</td>
<td>(D) 4 digits</td>
<td>—</td>
</tr>
<tr>
<td>Key No. in reception setting</td>
<td>—</td>
<td>(B) 2 digits</td>
<td>5-38</td>
</tr>
</tbody>
</table>

*1 When the machine receives originals, the Encryption Box is not used.

**NOTE**

Set the same characters for the numbers indicated by the same letter in parentheses. For example, the same characters should be used as the encryption key (C) in both the sending and receiving systems.
Registering an Encryption Key

An encryption key is required when registering the Address Book used for encryption communication (the other party is directly entered using the numeric keys) in the sending system and when setting encryption in the receiving system.

For the creation of the encryption key, numbers from 0 to 9 and letters from A to F are arranged to form 16 numbers and/or letters arbitrarily. The created encryption key is registered with a 2-digit key No. (01 to 20).

**NOTE**
Up to 20 encryption keys can be registered.

1. **Display the screen.**
   

2. **Configure the function.**
   
   1. Select the unregistered encryption key > [Add/Edit]
   2. [Encryption Key] > Enter the 16-digit encryption key > [OK] > [OK]

   **NOTE**
   Use numbers (0 to 9) and alphabetical letters (A to F) to register the encryption key.

3. **Finish registration.**
   
   Select [Close].

Changing Registration Contents of Encryption Key

1. **Display the screen.**
   

2. **Changing.**
   
   1. Select the encryption key you want to change > [Add/Edit]
   2. [Encryption Key] > Enter the 16-digit encryption key > [OK] > [OK] > [Yes]

   To change other encryption keys, repeat steps 2-1 to 2-2.

3. **Finish changing.**
   
   Select [Close].
Deleting Registration Contents of Encryption Key

1 Display the screen.

2 Deleting.

1 Select the encryption key you want to delete, and select [Delete].

2 Select [Yes].

This deletes the encryption key.

3 Finish deleting.

Select [Close].

Using the Encrypted Transmission

When sending originals by encrypted transmission, use the Address Book registered for encryption or set encrypted transmission when dialing directly using the numeric keys.

1 Register the encryption key ahead of time.

Register the encryption key that you decided upon with the recipient.

For the procedure for registering an encryption key, refer to the following:

   Registering an Encryption Key (page 5-36)

2 Select [FAX] on the Home screen.

3 Place the originals.

4 Specifying destination.

Use the numeric keys to enter the destination fax number.

   NOTE

   Encrypted transmission can be also used in broadcast transmission. With encryption communication, you cannot conduct sub address transmission.

   NOTE

   When encrypted transmission has been set to a destination in the Address Book or One Touch Key, you can use the destination.

5 Turn on encrypted transmission.

1 [Detail] > "Encrypted Transmission" [Change] > [On]

2 Select the encryption key number that you used to register the encryption key that you decided upon with the recipient.

   For the procedure for registering an encryption key, refer to the following:

   Registering an Encryption Key (page 5-36)
Select the encryption box.
If you need to select an encryption box, set the box.

1. [Encryption Box] > [On] > [Box No.]
2. Enter the box number (0000 to 9999) with the numeric keys.

Finish the encrypted transmission settings.
[OK] > [OK] > [OK]

Send Start.
Press the [Start] key.
The transmission will start.

NOTE
When [On] is selected in [Dest. Check before Send], a destination confirmation screen is displayed when you press the [Start] key.
- Confirmation Screen of Destinations (page 7-13)

Setting the Encrypted Reception
To conduct encryption communication operating the receiving system, follow the steps below.

1. Register the encryption key ahead of time.
Register the encryption key that you decided upon with the sender.
For the procedure for registering an encryption key, refer to the following:
- Registering an Encryption Key (page 5-36)

2. Display the screen.
[System Menu/Counter key > [FAX] > "Reception" [Next]

3. Turn on encrypted reception.
1. "Encrypted Reception" [Change] > [On]
2. Select the encryption key number that you used to register the encryption key that you decided upon with the sender.
3. Select [OK].
The machine receives the encrypted originals from the sender of the specified encryption key.
Using a Connected Telephone

It is possible to connect a telephone (a commercially available item) to this machine and use various functions.

FAX/TEL Auto Switch Reception

This reception method is convenient when using both telephone and fax on a single telephone line. When fax originals have been sent, the machine automatically receives them, and when the other party is calling from a telephone, the machine makes a ringing tone urging the user to respond.

**IMPORTANT**

In order to use FAX/TEL Auto Switch Reception, it is necessary to connect a telephone set (commercially available product) to the machine.

After the telephone has made a ringing tone for the preset number of times, the other party is required to pay phone line charges even if the receiving system does not respond.

Flow of reception

After the end of the conversation, you can receive faxes by using the Remote Switch Function.
Using Convenient Fax Functions > Using a Connected Telephone

Preparation:
Select [Auto (FAX/TEL)].

1. The telephone rings.

   - The connected telephone set makes a ringing tone.

   **NOTE**
   You can change the number of times the ringing tone rings.
   
   **Rings(FAX/TEL) (page 8-13)**

2. Answer the call.

   **When the call is from a telephone**

   1. The machine makes a ringing tone urging the user to respond. Lift the handset of the telephone within 30 seconds.

   **NOTE**
   If you do not lift the handset within 30 seconds, the machine switches to fax reception.

   2. Talk to the other party.

   **NOTE**
   At the end of the conversation, you can also receive faxes by using the Remote Switch Function.
   
   **Remote Switch Function (page 5-47)**

   **When the call is from a fax**

   The machine starts receiving fax originals.
FAX/Answering Machine Auto Switch Reception

This method is convenient when using both the answering machine and fax. When fax originals have been sent, the machine receives them automatically, and when the call is from a telephone, the machine follows the functions of the connected answering machine. Therefore, when the user is absent, the other party can leave a message on the answering machine.

**IMPORTANT**

When using FAX/Answering Machine Auto Switch Reception function, if a silence continues for at least 30 seconds before one minute passes after the machine has received a call from the other party, the machine’s silence detection function comes into operation and the machine switches to fax reception.

**NOTE**

In order to use FAX/Answering Machine Auto Switch Reception, it is necessary to connect an answering machine-equipped telephone set (commercially available product) to the machine.

For details, such as responding to messages, refer to the Operation Guide of each answering machine.

Set the number of rings to be made by the machine more than the number of rings to be made by the answering machine.

> **Rings (TAD) (page 8-12)**

**Flow of reception**

<table>
<thead>
<tr>
<th>FAX</th>
<th>FAX</th>

<td></td>
</tr>
</tbody>
</table>

- Receive fax originals from the other party automatically (FAX Automatic Reception).
- The answering machine plays the message informing the other party that the user is absent.
- The answering machine records a message from the other party.
- When the other party starts sending originals, the machine receives the originals being sent.

**Preparation:**

Select [Auto (TAD)].

> **RX Setting (page 8-13)**
1 The telephone rings.

The connected telephone set makes ringing tone the set number of times.

NOTE
If you lift the handset while the telephone set is still making the ringing tone, the machine enters a status the same as manual reception.

Manual Reception (page 5-46)

2 The answering machine responds.

When the call is from a telephone, but the user is absent

The answering machine plays a response message, and starts recording the other party’s message.

NOTE
When silence continues for at least 30 seconds during recording, the machine switches to fax reception.

When the call is from a fax

The machine starts receiving fax originals.
DRD Reception (Available for some countries.)

This reception mode utilizes the Distinctive Ring Pattern service available through some telephone companies. With this service, you can use two or more fax numbers on a single telephone line. Thus, you can use this fax and a telephone on the same line, and you can still designate a different fax number for each of them. As each number is given a different ring pattern, the machine is able to differentiate between incoming calls. If one of these numbers is designated for the machine, and a desired ring pattern is designated for that number in advance, fax reception will be initiated automatically whenever the machine detects the ring pattern distinctive to the fax.

**NOTE**
Using DRD Reception to receive a telephone call is only possible if a separately purchased telephone is connected to the machine. DRD reception is only possible if you subscribe to the Distinctive Ring Pattern service provided by your telephone company. Contact your telephone company for further information on the Distinctive Ring Pattern service available.

**Flow of reception**

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>The fax machine will ring using the predetermined ring pattern for a fax and fax reception will start automatically. (The fax will handle the call using the Automatic FAX Reception mode.)</td>
<td>The fax machine will ring using the predetermined ring pattern for a telephone call. Conversation is possible with the other party if you answer the telephone that is connected to this fax machine.</td>
</tr>
</tbody>
</table>

**Preparation:**
Select [Auto (DRD)].

➤ RX Setting (page 8-13)
1 The telephone rings.

When a call comes in, the telephone will ring.

**NOTE**
If you lift the handset while the telephone is still ringing, the machine will deal with the call in the same manner as standard Manual FAX Reception.

[Manual Reception (page 5-46)]

2 Answer the call.

The machine will then ring using the predetermined ring pattern.

**When the call is from a telephone**
Lift the handset and speak with the other party. When the conversation is over, fax reception can be initiated manually.

**When the call is from a fax**
Once the ringing tone stops, fax reception will start automatically.
Manual Send

When you want to talk to the person at the receiving system or the receiving system needs to switch to fax, use this method to send originals.

1. Place the originals.
2. Dial the destination.

Lift the handset, and dial the number of the receiving system.

3. Check if the telephone line has connected to the fax of the receiving system.
   - If the destination is a fax machine, you will hear a long high beep sound. If a person answers, you can talk to that person.

4. [FAX] on the Home screen > [On Hook]

5. Press the [Start] key.
   - Transmission begins.

6. Replace the handset.
   - When sending starts (when the [Processing] indicator on the operation panel starts blinking), return the handset to its original position.
Manual Reception

Reception is possible after confirming that the telephone line has connected to the sending party.

1 The telephone rings.
When there is an incoming call, the telephone connected to the machine makes a ringing tone.

2 Lift the handset.

Lift the handset of the telephone.

3 Check if the telephone line has connected to the fax of the sending system.
If the destination is a fax machine, you will hear soft beep sounds. If a person answers, you can talk to that person.

4 [FAX] on the Home screen > [On Hook] > [Manual RX]
Reception will start.

5 Replace the handset.
When reception starts (when the [Processing] indicator on the operation panel starts blinking), return the handset to its original position.
**Remote Switch Function**

You can start fax reception by operation from the connected telephone set. This function is convenient for using this machine and a telephone set (commercially available product) in combination installed at places distant from each other.

---

**NOTE**

In order to use remote switch, it is necessary to connect the tone signal-sending telephone set (commercially available product) to the machine. However, even if it is a tone signal-sending telephone set, this function may not be used satisfactorily depending on the type of telephone set. For details, contact our agent or the store where you purchased this machine.

The remote switch dial is set to 55 at the factory.

The remote switch dial number can be changed.

[Remote SW Dial (page 8-13)]

---

**Using the Remote Switch Dial**

To start fax reception by operation from the connected telephone set, use the following operation.

1. **The connected telephone set makes a ringing tone.**

   Lift the handset of the telephone.

   **NOTE**
   
   You can change the number of times the ringing tone rings.

   [Rings(Normal) (page 8-12)]

2. **Press the remote switch dial number (2 digits).**

   When you hear the fax tone from the handset, enter the two-digit remote switch dial number using the dial button on the telephone set. The telephone line switches to the machine, and reception starts.
6 Sending Faxes from PC

This chapter explains the following topics:

Flow of Network FAX Sending ................................................................................................... 6-2
Flow of Network FAX Receiving ......................................................................................................... 6-2
Setup ................................................................................................................................................. 6-3
  Installing the FAX Driver .................................................................................................................. 6-4
  Uninstalling the FAX Driver .............................................................................................................. 6-6
Basic Transmission ........................................................................................................................................ 6-7
  Configuring the Driver Default Settings ............................................................................................. 6-10
  Default Settings Dialog Box .................................................................................................................. 6-11
  Changing Transmit Settings .................................................................................................................. 6-15
  Using Cover Pages ................................................................................................................................. 6-20
  Cover Page Registration (Default Settings) .............................................................................................. 6-26
  Transmission Control ............................................................................................................................... 6-32
The Network FAX function enables any PC, which is networked to the machine, to perform sending and receiving of faxes. Its primary features include the following.

- PC-prepared document can be sent and received by fax without being printed out.
- An Address Book (in the machine/PC) can be used to specify a desired destination.
- Addition of a cover page.
- Transmission and printing can be done simultaneously.
- E-mail reporting of the transmission result.
- Sub address transmission is available.
- Operation is as simple as printing.

### Flow of Network FAX Sending

Network FAX sending is performed in the following sequence.

1. Prepare a document using a PC networked to this machine.
2. Forward the document data from the PC to this machine using the same operation as for printing.
3. The machine sends the document data to another fax machine.
4. The other fax machine receives the data.

### Flow of Network FAX Receiving

Network FAX receiving is performed in the following sequence.

1. Another fax machine sends a fax to this machine.
2. The machine receives the fax.
3. The machine sends the fax data to a networked PC using the memory forwarding function.
4. The PC networked to this machine receives the data.

**NOTE**

The memory forwarding function allows not only reception by the networked PC, but also forwarding of the received fax by e-mail or forwarding to another fax machine.
The following preparation is needed before using Network FAX.

**Connection to a PC**
Connect the machine and PC to the network using a network cable.

- Machine’s *Operation Guide*

**Machine Registration**
Using the memory forwarding function, select the recipient PC or file format.

![NOTE]
You can forward the received fax to the PC or forward it as an e-mail attachment.

- *Memory Forwarding (page 5-2)*
Installing the FAX Driver
The procedure for installing the FAX Driver is explained below. (The screens in Windows 8.1 are shown.)

1 Insert the Product Library disc.

![Insert Product Library disc](image)

NOTE
Installation on Windows must be done by a user logged on with administrator privileges.
If the "Welcome to the Found New Hardware Wizard" dialog box displays, select [Cancel].
If the autorun screen is displayed, click [Run Setup.exe].
If the user account management window appears, click [Yes].

2 Display the screen.

![Display the screen](image)

1 Click [View License Agreement] and read the License Agreement.
2 Click [Accept].

3 Select Custom Install.
Select [Custom Install].

4 Select FAX Driver.

![Select FAX Driver](image)

1 Select the device to be installed.
2 Click [ ].
3 Select the product to be installed.
4 Select [FAX Driver].
5 Click [ ].
6 Click [Install].
5 Finish the installation.

If a system restart message appears, restart the computer by following the screen prompts. This completes the FAX driver installation procedure.

**NOTE**
The machine cannot be detected unless it is on. If the computer fails to detect the machine, verify that it is connected to the computer via a network cable and that it is turned on and click (Refresh).

If the Windows security window appears, click [Install this driver software anyway].
Uninstalling the FAX Driver

Perform the following procedure to delete the FAX Driver from your computer.

NOTE
Uninstallation on Windows must be done by a user logged on with administrator privileges.

1 Display the screen.
Click [Search] in charms, and enter "Uninstall Kyocera Product Library" in the search box. Select [Uninstall Kyocera Product Library] in the search list.

NOTE
In Windows 7, click [Start] button on the Windows and then select [All Programs], [Kyocera], and [Uninstall Kyocera Product Library] to display the Uninstall Wizard.

2 Uninstall the software.
Place a check in the check box of the driver to be deleted and click [Uninstall].

3 Finish uninstalling.
If a system restart message appears, restart the computer by following the screen prompts. This completes the software uninstallation procedure.

NOTE
The software can also be uninstalled using the Product Library.
In the Product Library screen, select to uninstall, and follow the on-screen instructions to uninstall the software.
Basic Transmission

This section explains the basic procedure for sending a fax by Network FAX. An Adobe Acrobat document is sent as an example.

1 Create the document to be sent.
   1 Use an application on your computer to create the document to be sent.
   2 Set the original size and orientation.
   3 Select [Print] from the File menu. The Print dialog box for the application that you are using will appear.

2 Select settings in the Print dialog box.

   1 Select the product name of the machine (XXX XXX NW-FAX) to be used in the printer name list.
   2 Set the print range and other settings.
   
   **NOTE**
   Make sure that the number of copies is set to 1. The following screen is an example. The actual dialog box will vary depending on the application that you are using.

   3 Click [Properties] to open the Properties window.
3 Select settings on the FAX Setting tab.

1 Specify fax settings such as the original size on the FAX Setting tab, and click [OK].

![FAX Setting tab](image)

For detailed information on the settings on the tab, refer to the following:
- [Configuring the Driver Default Settings](#)

2 You will return to the Print dialog box for the application. Click [Print]. The Transmit Settings dialog box will appear.

4 Select settings in the Transmit Settings dialog box.

You can specify settings such as a transmission time or a sub-address in the Transmit Settings dialog box.

For details on the settings, refer to the following:
- [Changing Transmit Settings](#)

5 Specify a cover page.

To include a cover page, select settings on the [Cover Page] tab.

For details on the settings, refer to the following:
- [Using Cover Pages](#)
6 Set the destination.

1 Use the keyboard to enter the destination fax number in the [Address Setting] tab. If you are using the optional Internet fax function, select the mode that you want to use ([FAX], [i-FAX (Via server - On)], or [i-FAX (Via server - Off)]) from "Transmission Mode", and enter the fax number or address of the other machine.
   • Maximum number of characters that can be entered: 64 characters
   • Characters that can be entered: 0 to 9, #, *, -, space (a space or “-“ CANNOT be entered as the first character)

2 Click [Add to Destination List]. The destination information will appear in the address list. To send to multiple destinations, repeat this operation.

3 To use the Address Book, click [Select from Address Book] and select the destination.

7 Click [Send]. Transmission will begin.

NOTE
If [Broadcast] is set to [Prohibit], it is not possible to enter multiple destinations.

Machine’s Operation Guide
Configuring the Driver Default Settings

Use the FAX Setting tab of the print settings screen to set the original size and other transmission conditions.

1 Display the screen.

1 In charms on Desktop, click [Settings], [Control Panel], and then [Devices and Printers].

**NOTE**

In Windows 7, click [Start] button on the Windows, and then click [Devices and Printers].

In Windows 10, click [Start] button on the Windows, [Control Panel], [hardware and sound], and then [Devices and Printers].

2 Right-click the product name of the machine you are using and select [Printing preferences] from the drop-down menu. The Printing Preferences screen will open.

2 Select settings.

The following settings can be specified.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Original Size</td>
<td>Select the size of the document being transmitted from the drop-down list. <em>Available settings:</em> Letter, Legal, Ledger (11 x 17), Statement, A3, A4, A5, Folio, B4 and B5(JIS)</td>
</tr>
<tr>
<td>Orientation</td>
<td>Specify whether the orientation of the document is portrait or landscape. <em>Available settings:</em> Portrait, Landscape</td>
</tr>
<tr>
<td>Resolution</td>
<td>Select the resolution of the document to be transmitted from the drop-down list. <em>Available settings:</em> 100 x 200 dpi Normal, 200 x 200 dpi Fine, 400 x 400 dpi Ultra fine, 600 x 600 dpi</td>
</tr>
<tr>
<td>FAX TX Setting</td>
<td>Click [FAX TX Setting] to change the default settings for fax transmission. The Default Settings dialog box will appear.</td>
</tr>
</tbody>
</table>
Default Settings Dialog Box

By setting the transmission conditions that you use most in this dialog box, you can minimize the need to change the settings each time.

The Default Settings dialog box can be accessed by the following procedure:

1 Display the screen.
   1 In charms on Desktop, click [Settings], [Control Panel], and then [Devices and Printers].

   **NOTE**
   In Windows 7, click [Start] button on the Windows, and then click [Devices and Printers].
   In Windows 10, click [Start] button on the Windows, [Control Panel], [hardware and sound], and then [Devices and Printers].

2 Configure the settings.
   (1) Sending Options Tab
(2) Cover Page Tab

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Attach Cover Page checkbox** | Check the checkbox when you want to add a cover page to your transmission.  

**NOTE**  
For information regarding the Cover Page registration method, refer to the following:  

盖章页注册 (默认设置) (页面6-26)  

(3) Authentication Tab
### User Login checkbox

- **Use Specific Login User Name**
  - Enter the Login User Name and Password. Transmission will be performed using the entered Login User Name and Password.
- **Prompt for Login User Name**
  - A screen for entering the Login User Name and Password will be displayed when attempting a transmission. The Login User Name and Password must be entered each time a transmission is attempted.

### Job Accounting checkbox

- **Use Specific Account ID**
  - Enter the Account ID. Transmission will be performed using the entered Account ID.
- **Prompt for Account ID**
  - A screen for entering the Account ID will be displayed when attempting a transmission. The Account ID must be entered each time a transmission is attempted.
(4) Sender Information Tab

Enter your own information into fields explained below to send a cover page with your faxes.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Company</td>
<td>A maximum of 64 characters can be entered.</td>
</tr>
<tr>
<td>Department</td>
<td>A maximum of 64 characters can be entered.</td>
</tr>
<tr>
<td>Name</td>
<td>A maximum of 32 characters can be entered.</td>
</tr>
<tr>
<td>Telephone Number</td>
<td>A maximum of 20 characters can be entered. (Entry is allowed for the characters 0 to 9, #, *, -, (, ), +, and spaces.)</td>
</tr>
<tr>
<td>FAX Number</td>
<td>A maximum of 20 characters can be entered. (Entry is allowed for the characters 0 to 9, #, *, -, (, ), +, and spaces.)</td>
</tr>
<tr>
<td>E-mail Address</td>
<td>A maximum of 128 characters can be entered. Available characters: Symbols (!, #, $, %, &amp;, ', +, - , /, =, @, [, ], ^, _, `, { and }) Alphanumerics (0 – 9, A – Z and a – z)</td>
</tr>
</tbody>
</table>

**NOTE**

Entering the e-mail address makes it possible to receive the transmission results report by e-mail. The fax machine must be set to transmit e-mail.

> Machine’s *Operation Guide*
Changing Transmit Settings

Transmit Settings can be changed at the time of transmission.

(1) Selecting a Destination from the Address Book

There are two types of Address Books from which you can select the party to transmit to. They are the fax machine's Address Book and Windows Address Book.

**NOTE**

There are three types of Address Books from which you can select the party to transmit to. They are the fax machine's Address Book, Windows Address Book, and the Address Book for the Network FAX data file (.fdt).

When using the fax machine's Address Book, the party must be registered in the fax machine's Address Book.

⇒ Registering Destinations in the Address Book (page 2-15)

1. **Click the [Select from Address Book] button.**

   The Address Selection dialog box opens.

2. **Select the desired Address Book.**

   To select the Address Book registered in the fax machine, select [Address Book/XXXX (model name)] from the drop-down menu.

   **NOTE**

   To use the Windows Address Book, select [Windows Address Book].

For adding an Address Book for Network FAX data file (.fdt), select the [Refer to Address Book], click on the [Add] button, and then select the [Address Book data file].
3 Select the Destination.

The destinations registered in the Address Book are shown in the list on the left side of the dialog box. To select an Internet fax destination or a group of destinations, select [i-FAX (Via server - On)], [i-FAX (Via server - Off)], or [Group] from the filter's pull-down menu.

Select the desired destination and click on the [Add>] button. The selected destination will be added to the [Destination List] (right side).

![Address Selection dialog box]

NOTE

- The list can be sorted. Click on the list item by which you want to sort the list (Number, Name, Fax Number). △ or ▼ are displayed next to the sorted items.
  In addition, the corresponding destinations can be selected using the sorted items by entering a search character string in the Search field.
- When a destination is selected, the destination details are displayed in the field at the bottom of the list. When a group is selected, the members of the group are displayed in the field at the bottom of the list.
- If [Broadcast] is set to [Prohibit], it is not possible to enter multiple destinations.

Machine's Operation Guide

To delete any of the destinations from the Destination List, select that destination and then click on the [Delete] button. To delete all of the destinations from the Destination List, click on the [Delete All] button.

4 Click on the [OK] button.

The [Transmit Settings] dialog box will be displayed once again.
(2) Subaddress-Based Communication

NOTE
In order to conduct sub address communication, the other party’s system also needs to be equipped with sub address communication functions of the same type.

1  Open the Option Settings dialog box.
Click on the [Option Settings] button in the [Address Setting] tab of the [Transmit Settings] dialog box.

2  Enter the sub-address and password as it is registered in the destination fax.

   • Maximum number of characters that can be entered: 20 characters
   • Characters that can be entered: 0 to 9, #, *, space (a space CANNOT be entered as the first character)

3  Click on the [OK] button.
The [Transmit Settings] dialog box will be displayed once again.
(3) Cover Page Settings

A Cover Page can be set as the first page of a fax transmission. In addition to the standard templates for Cover Pages, original templates can be created and used.

To attach and transmit a Cover Page, place a check in the check box for [Attach Cover Page] in the [Cover Page] tab.

![Image of Cover Page settings]

**NOTE**
For information regarding how to use Cover Pages, refer to the following:

- Using Cover Pages (page 6-20)

(4) Optional Settings

The settings that were selected in “(1) Sending Options Tab” can be changed by clicking the [Option] tab.

![Image of Optional Settings]

For the setting procedures, refer to the following:

- (1) Sending Options Tab (page 6-11)
(5) Transmitting Terminal Information Data

The settings that were selected in “(4) Sender Information Tab” can be changed by clicking the [Sender Information] tab.

For the setting procedures, refer to the following:

(4) Sender Information Tab (page 6-14)

(6) Internet fax Setting

For Internet fax transmission, click on the [Internet FAX] tab and enter the Subject and the message.

Subject: A maximum of 60 characters can be entered.
Message: A maximum of 500 characters can be entered.

NOTE
If the other machine is set to print a cover page, the subject and message are printed.
Using Cover Pages

Cover Page Selection (Transmission Settings)

The Cover Page is attached to the fax and sent as the first page.

About Cover Pages

The Cover Page can be selected from a template. The Cover Page contains such destination information and sender information as that shown below.

Sample of English template 01

<table>
<thead>
<tr>
<th>No.</th>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>10</td>
<td>Message</td>
</tr>
</tbody>
</table>
Attaching and Transmitting a Cover Page

The procedure for attaching and transmitting a Cover Page is shown below.

1. **Open the Transmit Settings dialog box.**
   
   Perform Steps 1 to 6 of the Basic Transmission method to display the Transmit Settings dialog box.
   
   ➤ [Basic Transmission (page 6-7)]

   When selecting the destination from an Address Book, refer to “(1) Selecting a Destination from the Address Book”, select the destination, and go to Step 4.
   
   ➤ [1) Selecting a Destination from the Address Book (page 6-15)]

2. **Enter the fax number.**

   In the [Address Setting] tab, enter the destination fax number and click on the [Option Settings] button.

   ![NOTE](image)

   For internet fax transmission via mail server, select [i-FAX (Via server - On)] from Transmission Mode and enter the Internet fax address.

   For internet fax transmission without mail server, select [i-FAX (Via server - Off)] from Transmission Mode and enter the Internet fax address.

5 Attach a Cover Page.

Click on the [Cover Page] tab and place a check in the [Attach Cover Page] checkbox.
Select the Cover Page to be attached.
Select a Cover Page template from the [Cover Page Templates] list.

**NOTE**
If the Cover Page is registered in the Default Settings, then the action of selecting the Cover Page for each transmission can be omitted.

- [Cover Page Registration (Default Settings) (page 6-26)]

Original Cover Page templates can be created.

- [Creating New Cover Page Templates (page 6-28)]

Check the contents of the Cover Page.

1. Click on the [Preview] button. A preview of the currently selected template will be displayed.

   ![Preview of Cover Page]

   To display a different template, use the drop-down menu at the top of the dialog box or click on the [] or [] button. The template display magnification can also be changed within the range of 25 to 250% from the drop-down menu.

**IMPORTANT**
Before transmitting the fax, be sure to use the Preview screen to check all of the displayed information including the recipient name and company name. If there is a large number of characters for information that is automatically entered, they might not completely fit in the field and the characters might not print correctly. If the characters are not displayed correctly, reduce the number of characters in the recipient information or sender information or edit the template being used.

2. Click on the [Close] button.
8 Edit the Message.
   1 Click on the [Edit Message] button.

![Edit Message screen]

   2 Enter the message to be added to the Cover Page and click on the [OK] button.

![Edit Message dialog]

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Message</td>
<td>A maximum of 1,000 characters can be entered.</td>
</tr>
</tbody>
</table>

9 Transmit.
   Click on the [Send] button to begin the transmission.
Cover Page Registration (Default Settings)

If the Cover Page is registered in the Default Settings, the action of selecting the Cover Page for each transmission can be omitted.

Template Selection

Select the Cover Page template to be registered in the Default Settings. The registration method is as follows.

1 **Open the Default Settings dialog box.**
   Perform the Default Settings Dialog Box procedure, open the [Default Settings] dialog box.
   - [Default Settings Dialog Box (page 6-11)]

2 **Attach a Cover Page.**
   Click on the [Cover Page] tab and place a check in the [Attach Cover Page] checkbox.

3 **Select the Cover Page to be attached.**
   Select a Cover Page template from the [Cover Page Templates] list.

   **NOTE**
   Original Cover Page templates can be created.
   - [Creating New Cover Page Templates (page 6-28)]
4 **Check the contents of the Cover Page.**

1. Click on the [Preview] button. A preview of the currently selected template will be displayed.

   ![Preview of Cover Page]

   To display a different template, use the drop-down menu at the top of the dialog box or click on the [↩] or [↪] button. The template display magnification can also be changed within the range of 25 to 250% from the drop-down menu.

2. Click on the [Close] button.

5 **Edit the Message.**

1. Click on the [Edit Message] button.

   ![Edit Message]

2. Enter the message to be added to the Cover Page and click on the [OK] button. A maximum of 1,000 characters can be entered.

6 **Click on the [OK] button.**
Sender Information Registration

Please register the sender information to be included on the Cover Page.

NOTE
For information regarding the registration method, refer to the following:

(4) Sender Information Tab (page 6-14)

Creating New Cover Page Templates

Perform the following procedure to create an original Cover Page template.

1. **Open the Default Settings dialog box.**
   Perform the Default Settings Dialog Box procedure, open the [Default Settings] dialog box.
   
   Default Settings Dialog Box (page 6-11)

2. **Edit the Cover Page templates.**
   
   The [Edit Cover Page] screen will be displayed.
2 Enter the characters.  
From the Menu bar, click on [Insert] and then [Textbox] and then position the textbox and enter the characters.

3 Position the field box.  
From the Menu bar's [Insert] menu, select the field box to be positioned.

**IMPORTANT**  
If there are too many characters in the entered information, such as recipient name or company name, the information will not fit in the field box and some of the characters could be cut off. When positioning the field box, make it large enough and adjust the font point size so that the inserted information will fit in the field box.

**NOTE**  
When a fax is transmitted, the information entered in the Default Settings and Destination Settings will automatically be entered in the fields.

The following field boxes can be used. Use them as required.
Position the figures, textboxes, etc., to create a Cover Page.

**NOTE**
For information regarding the operation method, refer to Help.

From the Menu bar click on [File] and then [Save As], enter the file name, and click on the [Save] button.

Close the [Edit Cover Page] screen.
The new template will be registered at the top of the list and can now be selected.
Transmission Control

Perform the following procedure when you want to use your computer to verify the status of a fax transmission currently being processed, or to actually terminate that transmission.

Once a fax transmission starts being processed, a Transmission Control icon will be displayed in the Windows Task Bar.

1. Double-click on that icon to access the Transmission Control window which indicates the status of all transmissions being processed.

   ![Transmission Control Icon]

   To terminate any transmission, select that transmission and then select [Cancel] from the Document menu.

Ending Transmission Control

Right click on the Transmission Control icon and select [Exit].

![Ending Transmission Control]

### Various Tools for Checking Transmission Results and Registration Status

Check the fax transmission results and registration status using the following tools.

<table>
<thead>
<tr>
<th>Tool</th>
<th>Display Location</th>
<th>Contents to Check</th>
<th>Timing of Check</th>
<th>Reference Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>FAX job history check</td>
<td>Touch panel</td>
<td>History of latest 100 send and receipt results stored</td>
<td>Any time</td>
<td>7-3</td>
</tr>
<tr>
<td>Send result report / Receipt result report</td>
<td>Report printing</td>
<td>Latest send or receipt result</td>
<td>Automatic printout after every sending or receiving operation (No Print Output or Error Only is also optionally available.)</td>
<td>7-7</td>
</tr>
<tr>
<td>Activity report</td>
<td>Report printing</td>
<td>Latest 50 send or receipt results</td>
<td>Any time, and automatic printout after every 50 sending/receiving</td>
<td>7-10</td>
</tr>
<tr>
<td>Status page</td>
<td>Report printing</td>
<td>Registration status of Local FAX Number, Local FAX Name, fax line setting, etc.</td>
<td>Any time</td>
<td>7-11</td>
</tr>
<tr>
<td>Reporting of FAX receipt result by Email</td>
<td>PC</td>
<td>Fax receipt</td>
<td>Fax reception is reported by e-mail.</td>
<td>7-12</td>
</tr>
</tbody>
</table>
Checking FAX Job History

Display the history of the latest 100 each of send and receipt results on the display for checking.

**NOTE**
Even when job accounting is enabled, 100 each of send and receipt results are displayed regardless of the account ID.

For details of the job history check, refer to the following:

➤ Machine’s Operation Guide

**Displaying Job Log Screen**

1. **Display the screen.**
   1. Select the [Status/Job Cancel] key.
   2. Select [Sending Jobs] to check send result, [Printing Jobs] to check receipt result, and [Storing Jobs] to check the results of file storage in FAX Boxes and Polling box. Then select [Log].

2. **Check**
   1. Select "Job Type" [✓], and select "FAX" or "i-FAX".
   2. Select [Close] to exit.
Description of the Job Log Screen

Items shown in each job log screen and the function of each key are as follows.

</table>

NOTE
Jobs stored in a Polling box appear as scanner ( ) job types.

Checking Details of the Job Log
You can check the detailed information of each job.

Displaying Details of the Job Log

1. Select the [Status/Job Cancel] key.

2. [Printing Jobs], [Sending Jobs] or [Storing Jobs] > [Log]

3. Select the job to check > [Detail]. Detailed information of the selected job is displayed.

NOTE
Select [▲] or [▼] to check information of the next or previous page.

4. Select [Close] to exit.

Printing Administrative Reports (Result Report Setting)

You can print various administrative reports to check the results of fax transmission or the status of the functional setup.

Send Result Reports

Each time you send a fax, you can print a report to confirm whether the fax was sent successfully. You can also print the transmitted image in the send result report.

1 Display the screen.

2 Configure the function.

1 Select [Off] (not to print), [On] (to print), [Error Only], or [Specify Each Job].

**NOTE**
When [Specify Each Job] is selected, it is possible to set a send result report when transmitting.

* FAX TX Report (page 3-29)

2 If you selected [On], [Error Only] or [Specify Each Job], specify whether the transmitted image is to be attached by selecting [Off] (do not print transmitted image), [Partial Image] (print part of the transmitted image at full size), or [Full Image] (print the entire transmitted image at reduced size).
Report for Job Canceled before Sending
Print a send result report when the job is canceled before being sent.

NOTE
This is not displayed if E-mail/Folder and Fax are both set to [Off] in Send Result Report.

1. Display the screen.

2. Configure the function.
   Select [Off] or [On].

Recipient Format
Select the Recipient Format for the send result report.
The name and destination that appear on the Send Result Report are taken from the information stored in the address book.
If [Name or Destination] is selected, either the name (destination name) or the destination (FAX No. or i-FAX address) stored in the address book is shown.
If [Name and Destination] is selected, both the name (destination name) and destination (FAX No. or i-FAX address) are shown.
When the destination was directly entered, only the destination (FAX No.) is shown.

1. Display the screen.

2. Configure the function.
   [Name or Destination] or [Name and Destination] > [OK]
FAX RX Result Reports

Each time you receive a fax, you can print a report to confirm whether the fax was received successfully.

**NOTE**
Fax receipt can also be notified by e-mail instead of checking the receipt result report.

> Reporting FAX Receipt Result by E-mail (page 7-12)

1. **Display the screen.**
   

2. **Configure the function.**

   Select [Off] (not to print), [On] (to print), or [Error/Storing in Box Only].
Activity Report (Outgoing FAX Report and Incoming FAX Report)

Activity reports are reports of both the sent faxes and the received faxes. Each report lists the history of the latest 50 sent or received fax data. When automatic printout is selected, a report is printed out automatically after every 50 faxes sent or received.

Printing Activity Reports

The latest 50 sent or received fax data are printed as a report.

1 Display the screen.
   [Status/Job Cancel] key > [Device/Communicate] > [Log]

2 Print
   1 Select [Outgoing] to print the sent fax report, and select [Incoming] to print the received fax report.

   2 [Print Report] > [Yes]
      The report is printed.

NOTE
You can select a shown fax job and select [Detail] to view detailed information of the job.

Automatic Printout

An activity report is printed out automatically after every 50 faxes sent or received.

1 Display the screen.

2 Configure the function.
   [Off] (not to print) or [On] (to print) > [OK]
Status Page

A status page provides information on a number of user setups. FAX-related information includes the Local FAX Number, Local FAX Name, fax line setting, etc. You can print it out as necessary.

1 Display the screen.

2 Print
   "Status Page" [Print] > [Yes]
   A status page is printed.
Reporting FAX Receipt Result by E-mail

Fax receipt can also be notified by e-mail instead of checking the receipt result report.

1 Display the screen.

2 Select the destination.
   Select from the address book
   1 [E-mail Address Book] > [Address Book]
   2 Select the destination from the Address Book and select [OK].

   NOTE
   For the procedure of selecting destinations from the Address Book, refer to following:
   ➤ Choosing from the Address Book (page 3-9)

   Enter the E-mail address
   1 [E-mail Address Entry] > [E-mail Address]
   2 Enter the address of the destination and select [OK].
      For details on character entry, refer to the following:
      ➤ Character Entry Method (page 12-2)
Confirmation Screen of Destinations

When selecting [On] for Dest. Check before Send, the confirmation screen of destinations appears after pressing the [Start] key.

Follow the steps below to confirm the destinations.

1. **Check all destinations.**
   
   Select [ ] or [ ] to confirm every destination. Select [Detail] to display the detailed information on the selected destination.

   **NOTE**
   
   Be sure to confirm every destination by displaying them on the touch panel. You cannot select [Check] unless you have confirmed every destination.

2. **Change a destination.**
   
   **Delete a destination**
   
   1. To delete the destination, select the destination you want to delete.
   2. [Delete] > [Yes]
      
      The destination is deleted.

   **Add a destination**
   
   To add the destination, select [Cancel] and then return to the destination screen.

3. **Select [Check].**
   
   When you have finished checking all destinations, select [Check].

4. **Press the [Start] key.**
   
   Start sending.

Default fax settings
This section explains the fax settings in the system menu.

Operation method

1 Display the screen.
   Select the [System Menu/Counter] key.

2 Select a function.

   1 Displays the System Menu items.
   2 Scrolls up and down when the list of values cannot be displayed in its entirety on a single screen.
   3 Displays setting items
      Select the key of a function to display the setting screen.
   4 Returns to the previous screen.

3 Configure the function.

   1 Enter a setting by selecting it.
   2 Accepts the settings and exits.
   3 Returns to the previous screen without making any changes.
NOTE

If the login user name entry screen appears during operations, log in by referring to the machine’s Operation Guide for Administrator User Name and Password.

The factory default login user name and login password are set as shown below.

<tr>
<td>Rings (TAD)</td>
<td>If the reception method is FAX/Answering Machine Auto Switch Reception, the number of rings until the machine answers a call can be changed as needed. NOTE: This setting does not appear in some regions.</td>
</tr>
</tbody>
</table>
## Fax Settings > Default fax settings

### FAX

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rings(FAX/TEL)</td>
<td>If the reception method is FAX/TEL Auto Switch Reception, the number of rings until the machine answers a call can be changed as needed. <strong>NOTE</strong> This setting does not appear in some regions.</td>
</tr>
</tbody>
</table>

### TX/RX Restriction

[System Menu/Counter] key > [FAX] > [TX/RX Restriction]

This function allows you to send or receive originals only when communication requirements are met.

**NOTE**

Transmission Restriction (page 8-16)

### RX Setting

Select the reception mode. **Value:** Auto (Normal), Auto (FAX/TEL), Auto (Answering Machine), Manual, Auto (DRD)

If Auto (DRD) is selected, select the DRD Pattern. **Value:** Pattern 1 (Normal Ring), Pattern 2 (Double Ring), Pattern 3 (Short-Short-Long), Pattern 4 (Short-Long-Short)

DRD reception mode is available for some countries.

- [FAX Reception (page 4-2)]
- [Manual Reception (page 4-4)]
- [DRD Reception (Available for some countries.) (page 5-43)]

### Remote SW Dial

To start fax reception by operation from the connected telephone set, use the following operation. **Value:** 00 - 99

- [Remote Switch Function (page 5-47)]

### Reception Port

You can make one of the 2 phone lines a receive-only line.

**Value:** Off, Port 1, Port 2

- [Reception Port Selection (page 9-XX)]

### ECM RX

Set whether ECM RX is performed.

ECM is a communication mode specified by the ITU-T (International Telecommunication Union) that retransmits data when an error occurs. Fax machines that have ECM mode check for errors as they communicate, preventing distortion of the image due to noise on the line and other conditions.

**Value:** Off, On

**NOTE**

When there is a large amount of noise on the line, communication may take slightly longer than when [Off] is selected.

### RX Start Speed

Change the RX Start Speed. When communication conditions are bad, the fax may not be received correctly. In that case, set a lower RX Start Speed.

**Value:** 9600bps, 14400bps, 33600bps

**NOTE**

Normally this should be used with the default setting.

### Encrypted Reception

Turns on reception by encrypted communication.

**Value:** Off, On

If turned on, select the encryption key.

- [Encryption (page 5-35)]

*1 This function is displayed when 2 optional FAX Kits (Dual FAX option) are installed.
Fax Settings > Default fax settings

RX/Forward Rules
[System Menu/Counter] key > [FAX] > [RX/Forward Rules]
When you have received a fax, you can forward the received image to other faxes and computers or specify a number of copies.

► Memory Forwarding (page 5-2)

New Destination Entry(FAX)
[System Menu/Counter] key > [FAX] > [New Destination Entry(FAX)]

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>New Destination Entry(FAX)*1</td>
<td>Select whether to permit direct entry of destination. When this option is set to [Prohibit], you cannot enter the destination directly. Value: Permit, Prohibit</td>
</tr>
</tbody>
</table>

*1 If [Prohibit] is set for new destination entry in [Send] in system menu, this option is grayed out and this option cannot be set.

Quick Setup Registration
[System Menu/Counter] key > [FAX] > [Quick Setup Registration]

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quick Setup Registration</td>
<td>Select the functions to be registered for Quick Setup. Six keys of the Quick Setup screen are allocated to typical functions but can be changed as necessary. Six items in the following options are available. Value: Original Size, 2-sided/Book Original*1, Sending Size, Original Orientation, Density, Original Image, FAX TX Resolution, Zoom, Continuous Scan</td>
</tr>
</tbody>
</table>

*1 This is "Book original" if the optional document processor is not installed.

Report
Print reports to check the machine settings and status, or set various reports for checking the results of sending and receiving.

Report Print
[System Menu/Counter] key > [Report] > [Print Report]

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>

  ➤ Activity Report (Outgoing FAX Report and Incoming FAX Report) (page 7-10) |

### Result Report Setting

[System Menu/Counter] key > [Report] > [Result Report Setting]

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| Send Result Report | Each time you send a fax, you can print a report to confirm whether the fax was sent successfully.  
  ➤ Send Result Reports (page 7-7) |
| FAX RX Result Report | When a fax is received, you can be notified by receipt result report.  
  ➤ FAX RX Result Reports (page 7-9) |
| Job Finish Notice Setting | Attaches sent images to job finish notices.  
  Value: Do Not Attach Image, Attach Image |
| RX Result Report Type | Fax receipt can also be notified by e-mail instead of checking the receipt result report.  
  ➤ Reporting FAX Receipt Result by E-mail (page 7-12) |
Transmission Restriction

This function allows you to send or receive originals only when communication requirements are met. Using this function can limit other parties with which you can communicate.

Specifically, you must register communication requirements (Permit FAX No./Permit ID No.) and set the transmission limit in advance. When the machine sends or receives originals, you do not need to perform a special operation for this particular function, and you can operate the machine normally. When sending or receiving has actually started, the machine correctly conducts transmission that meets communication requirements, but when the transmission does not meet the requirements, the machine indicates an error. This mode also allows you to set a [Reject List] for Reception Restriction so that reception from senders on the list of Rejected FAX numbers or from senders whose Local FAX Number is not registered are rejected. (You can select whether reception from a party whose local fax number is not registered is allowed or rejected in "Unknown Number Reception").

**NOTE**
Before using transmission restriction, be sure to read the following prerequisites, communication establishing requirements, and reception rejection requirements thoroughly, and consult with the other parties with which you communicate.

<table>
<thead>
<tr>
<th>Prerequisites</th>
<th>Communication Establishing Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Send Restrictions</strong></td>
<td>• Register Permitted FAX numbers or Permitted ID numbers. *1</td>
</tr>
<tr>
<td></td>
<td>• Send restriction settings are specified in [Permit List + Address Book] in Send Restrictions.</td>
</tr>
<tr>
<td></td>
<td>• Register the Local FAX Numbers or Local FAX IDs of other parties.</td>
</tr>
<tr>
<td><strong>Reception Restrictions</strong></td>
<td>• Register Permitted FAX numbers or Permitted ID numbers. *2</td>
</tr>
<tr>
<td></td>
<td>• Reception restriction settings are specified in [Permit List + Address Book] in Reception Restrictions.</td>
</tr>
<tr>
<td></td>
<td>• Register the Local FAX Numbers or Local FAX IDs of other parties.</td>
</tr>
</tbody>
</table>

*1 If there is neither a Permitted FAX No. nor a Permitted ID No. registered for the recipient, sending is not rejected.

*2 If there is neither a Permitted FAX No. nor a Permitted ID No. registered for the sender, reception is not rejected.
Registering Permit FAX No.

**NOTE**
Up to 50 Permit FAX numbers can be registered.

1. **Display the screen.**
   
   [System Menu/Counter key] > [FAX] > "TX/RX Restriction" [Next] > "Permit No. List" [Add/Edit]

2. **Add a permit fax number.**
   
   1. Select [Add].
   2. Use the numeric keys to enter Permit FAX No. Up to 20 digits can be entered.

   **NOTE**
   Select [Pause] to insert a pause (-) between numbers.
   Select [Space] to enter a space.
   Use [<] or [>] to move the cursor.
   Selecting [Backspace] deletes the character to the left of the cursor.

   3. Select [OK].

3. **To register another permit fax number, repeat Steps 2-1 to 2-3.**
Fax Settings > Transmission Restriction

Changing Permit FAX No.

1 Display the screen.

2 Changing
   1 Select [Detail] for Permit FAX No. you want to change, and enter the new number.

   NOTE
   For the procedure for entering a number, refer to the following:
   ➡ Registering Permit FAX No. (page 8-17)

   2 [OK] > [Yes]
   The registration is changed.

Deleting Permit FAX No.

1 Display the screen.

2 Deleting
   1 Select Permit FAX No. you want to delete, and select [Delete].

   2 Select [Yes].
   The registration is deleted.
Registering Reject FAX No.

1 Display the screen.

2 Add a Reject FAX No.
1 Select [Add].
2 Use the numeric keys to enter Reject FAX No. Up to 20 digits can be entered.

NOTE
Select [Pause] to insert a pause (-) between numbers.
Select [Space] to enter a space.
Use [<] or [>] to move the cursor.
Selecting [Backspace] deletes the character to the left of the cursor.

3 Select [OK].

3 To register another Reject FAX No., repeat Steps 2-1 to 2-3.

Changing Reject FAX No.

1 Display the screen.

2 Changing
1 Select [Detail] for Reject FAX No. you want to change.
2 Enter the new number.

NOTE
For the procedure for entering a number, refer to the following:
[Registering Reject FAX No. (page 8-19)]

3 [OK] > [Yes]
The registration is changed.
Deleting Reject FAX No.

1 Display the screen.

2 Deleting
   1 Select Reject FAX No. you want to delete, and select [Delete].
   2 Select [Yes].
      The registration is deleted.

Registering Permit ID No.

   NOTE
   Up to 25 Permit ID numbers can be registered.

1 Display the screen.

2 Add a Permit ID No.
   1 Select [Add].
   2 Use [+]/[-] or the numeric keys to enter Permit ID No. (0000 to 9999).
   3 Select [OK].

3 To register another Permit ID No., repeat Steps 2-1 to 2-3.
Changing Permit ID No.

1 Display the screen.

2 Changing

1 Select [Detail] for Permit ID No. you want to change.

2 Enter the new number.

   NOTE
   For the procedure for entering a number, refer to the following:
   ➤ Registering Permit ID No. (page 8-20)

3 [OK] > [Yes]
   The registration is changed.

Deleting Permit ID No.

1 Display the screen.

2 Deleting

1 Select Permit ID No. you want to delete, and select [Delete].

2 Select [Yes].
   The registration is deleted.
Setting Send Restriction
Restrict the other parties to which you send originals only to the ones registered in Permit FAX No. and Permit ID No. as well as the ones registered in the Address Book. To change the sending restriction, follow the steps below.

1 Display the screen.
([System Menu/Counter] key > [FAX] > "TX/RX Restriction" [Next] > "TX Restriction" [Change])

2 Configure the function.
To not use the sending restriction, select [Off].
To restrict the other parties to which you send originals only to the ones registered in Permit FAX No. and Permit ID No. as well as the ones registered in the Address Book, select [Permit List + Address Book].

Setting Reception Restriction
Restrict incoming faxes so that you only receive originals from senders registered in Permit FAX No. and Permit ID No. and senders registered in your Address Book. This mode also allows you to set a [Reject List] for Reception Restriction so that reception from senders on the list of Rejected FAX numbers or from senders whose Local FAX Number is not registered are rejected. (You can select whether reception from a party whose local fax number is not registered is allowed or rejected in “Unknown Number Reception”.)

To change the reception restriction, follow the steps below.

1 Display the screen.
([System Menu/Counter] key > [FAX] > "TX/RX Restriction" [Next] > "RX Restriction" [Change])

2 Configure the function.
To not use the reception restriction
Select [Off] > [OK]
To restrict the other parties from which you receive originals only to the ones registered in Permit FAX No. and Permit ID No. as well as the ones registered in the Address Book
Select [Permit List + Address Book] > [OK]
To block incoming faxes from senders registered in Reject FAX No.
Select [Reject List] > [OK]

Unknown Number Reception
Select whether to receive the fax of that the number is unknown when [Reject List] is set for Reception Restriction.
To change the reception restriction for the unknown fax number, follow the steps below.

1 Display the screen.
([System Menu/Counter] key > [FAX] > "TX/RX Restriction" [Next] > "Unknown No. Reception" [Change])
Configure the function.

To receive faxes from the unknown number
Select [Permit] > [OK]

To reject faxes from the unknown number
Select [Reject] > [OK]
Unusable Time

This feature sets a time period during which the machine will not print received faxes.

**IMPORTANT**

When Unusable Time is set, in addition to fax printing, all other printing operations are prohibited during the unusable time period, including printing of copy jobs and printer jobs, and printing from USB memory.

Faxes and print jobs received during the unusable time period are printed after the unusable time period ends, or when the unusable time period is temporarily canceled.

**NOTE**

If the login user name entry screen appears during operations, log in by referring to the machine’s *Operation Guide for Administrator User Name and Password.*

The factory default login user name and login password are set as shown below.

<table>
<thead>
<tr>
<th>Model Name</th>
<th>Login User Name</th>
<th>Login Password</th>
</tr>
</thead>
<tbody>
<tr>
<td>TASKalfa 2552ci</td>
<td>2500</td>
<td>2500</td>
</tr>
<tr>
<td>TASKalfa 3011i</td>
<td>3000</td>
<td>3000</td>
</tr>
<tr>
<td>TASKalfa 3252ci</td>
<td>3200</td>
<td>3200</td>
</tr>
<tr>
<td>TASKalfa 3511i</td>
<td>3500</td>
<td>3500</td>
</tr>
<tr>
<td>TASKalfa 4002i/TASKalfa 4052ci</td>
<td>4000</td>
<td>4000</td>
</tr>
<tr>
<td>TASKalfa 5002i/TASKalfa 5052ci</td>
<td>5000</td>
<td>5000</td>
</tr>
<tr>
<td>TASKalfa 6002i/TASKalfa 6052ci</td>
<td>6000</td>
<td>6000</td>
</tr>
</tbody>
</table>

1. **Display the screen.**
   
   [System Menu/Counter] key > [Date/Timer/Energy Saver] > "Unusable Time" [Change]

2. **Configure the function.**

   **Set the unusable time**

   Select [On] and use [+] or [-] to enter the start time and end time.

   **NOTE**

   If the same time is set as the start time and end time, you cannot use all day.

   **Set the cancel code**

   Specify the code to temporarily cancel the unusable setting during unusable time.

   1. Select [Unlock code].
   2. Enter Unlock Code (0000 to 9999).
3 Select [OK].

4 [OK] > [OK]

NOTE
To use the machine temporarily during unusable time, enter the Unlock Code and select [Login].
Account Management

Account management is user management that specifies the users who can use the machine and job accounting that controls the usage per account. In user accounting, up to 1,000 users can be managed using User ID and Password. In job accounting, the status of fax use per account can be known for up to 1,000 accounts for sending of originals and making communication reservation after entering Account ID. For each management method, refer to the following:

Machine’s Operation Guide

It will be necessary to log in if user management or department management are enabled. For the method for logging in, refer to the following:

Login/Logout (page 3-16)

*1 This function is displayed when 2 optional FAX Kits (Dual FAX option) are installed.

NOTE

Machine’s Operation Guide
Communication modes subject to job accounting

- Normal transmission
- Delayed transmission
- Broadcast transmission
- Sub address transmission
- Encrypted transmission
- Manual send when dialed from this machine to the receiving system
- Polling reception
- Sending Faxes from PC (Destinations include FAX and i-FAX destinations.)
- i-FAX Transmission
- Transmission from the document box

Restriction of use function

When you have enabled job accounting, you need to enter an Account ID when performing the following operations.

- Normal transmission
- Delayed transmission
- Broadcast transmission
- Sub address transmission
- Output from FAX Box
- Encrypted transmission
- Manual send when dialed from this machine to the receiving system
- Polling reception
- Sending Faxes from PC (Destinations include FAX and i-FAX destinations.)
- i-FAX Transmission
- Transmission from the document box

**IMPORTANT**

You can use ‘Make a call’, ‘Checking FAX Job History’ and ‘Communication Control Report Output’ functions without entering an Account ID or Administrator No.

When job accounting has been enabled, batch transmission function works only for communication to be performed for the same Account ID. The communication to be performed with a different Account ID is not conducted as a batch transmission.

Normally, the Local FAX Name is printed in the transmit terminal identification (TTI). However, when job accounting is enabled and an Account ID is entered when a fax is sent, you can enable a setting to have the Account Name or Local FAX Name, whichever was selected, be printed.

[Account as Local FAX Name (page 8-10)]
This chapter introduces the optional equipment available for the FAX kit.

Internet FAX Kit (A) "Internet FAX Kit" ......................................................... 9-2

Internet FAX Kit(A) "Internet FAX Kit"

You can use Internet FAX on this machine.

► Internet Faxing (i-FAX) (page 10-1)
Dual FAX

Installing 2 optional FAX Kits (Dual FAX option) allows you to use 2 phone lines. This reduces the time until faxes are sent to all the recipients in tasks such as sequential broadcast transmissions to multiple recipients. Also, because you can then send and receive simultaneously, there will be fewer occasions when you cannot receive a fax during fax transmission.

Dual FAX Settings
Specifying the settings for the second line.

 Transmission (page 8-10)

Reception Port Selection
You can make one of the 2 phone lines a receive-only line.

1 Display the screen.

2 Configure the settings.
1 Select a receive-only port. If you do not want to set up a receive-only port, select [Off].
2 Select [OK].
Job Accounting Port Restrictions

If job accounting is enabled, you can restrict access so that departments can only use one port.

1 Display the screen.
   1 [System Menu/Counter] key > [User Login/Job Accounting]

   ![NOTE]
   If the user authentication screen appears, enter your login user name and login password and select [Login].

   The factory default login user name and login password are set as shown below.

   Machine's Operation Guide
10 Internet Faxing (i-FAX)

This chapter explains how to use the Internet faxing (i-FAX) using the Internet FAX Kit.

What is i-FAX? ................................................................................................................................................. 10-2
i-FAX Settings .................................................................................................................................................. 10-5
Accessing Command Center RX .................................................................................................................. 10-5
i-FAX Default Settings............................................................................................................................... 10-6
i-FAX transmission procedure .................................................................................................................... 10-10
Checking the Send Status ......................................................................................................................... 10-12
i-FAX Reception ........................................................................................................................................... 10-13
What is i-FAX?

The i-FAX function sends and receives faxes via the Internet without using a phone line.

The main features of i-FAX are:

• It reduces communication costs since it does not use a phone line.
• Address books (on this machine or on a computer) can be used to specify destinations.
• Faxes can be sent to multiple recipients simultaneously.
• Memory forwarding can be used to forward faxes received by this machine to multiple recipients as Internet faxes.

► Memory Forwarding (page 5-2)
• E-mail notification of transmission results
• Direct SMTP is supported, which enables direct communication (without going through a mail server) with a machine that supports Internet fax and is connected via LAN. Real time transmission and reception are possible.

Example of sending i-FAX

![i-FAX Transmission Flowchart]

Scan the original on this machine.

▼

Send the fax to the recipient’s E-mail address.

▼

The mail server receives the fax.

▼

The recipient’s fax machines download the fax from the mail server.

NOTE

When Direct SMTP is used, communication does not go through a mail server, and thus a document scanned on your machine is sent directly to the destination Direct SMTP compliant machine.
i-FAX Reception Flowchart

The procedure for receiving an i-FAX is shown below.

1. Another fax machine sends a fax to this machine's E-mail address.
2. The mail server receives the fax.
3. This machine downloads the fax from the mail server.
4. This machine prints the received fax.

**NOTE**
When Direct SMTP is used, communication does not go through a mail server, and thus your machine directly receives and prints a document sent from another fax machine.

**Notes on Using i-FAX**

To use i-FAX, you must connect this machine to a computer using a network cable and specify the network settings.

- If you cannot successfully send an i-FAX to the recipient, you normally receive an E-mail error message from the server. However, in some cases problems can arise such that you do not receive the error message. For important faxes, you should contact the recipient to check whether the fax was successfully received.
- Due to the low level of security in Internet communication, important documents should be faxed over a direct telephone line.
- Communication over the Internet may take some time due to network congestion or communication faults. Urgent faxes should be sent over a direct telephone line.
- Because Internet faxing sends the faxed originals as files attached to an E-mail message, you cannot communicate directly with the recipient.
- You cannot have a telephone conversation via the Internet.
- The resolution, compression mode and paper sizes that you can use for transmissions are dependent on the performance of the receiving machine. Check the specifications of the receiving machine before sending the fax. If you do not know the specifications of the receiving machine, the recommended transmission settings are a resolution of 200 × 200 dpi, the MH compression mode and a paper size of A4.
- If only Direct SMTP, which does not go through a mail server, will be used, the SMTP settings / POP3 server settings in the i-FAX settings are not necessary.

**Functions not available when sending an i-FAX**

The following functions are not available when sending an i-FAX. They are available when sending a normal fax.

- Delayed transmission
- Direct transmission
- Polling transmission
- Transmission using ECM communication
- Encrypted transmission
- Sub address transmission
- Send restriction by registering permitted FAX numbers
- Send restriction by registering permitted ID numbers
Internet Faxing (i-FAX) > What is i-FAX?

Functions not available when receiving an i-FAX

The following functions are not available when receiving an i-FAX. They are available when sending a normal fax.

- Reception using a sub address
- Polling reception
- Encrypted reception
- Reception restriction by registering permitted FAX numbers
- Reception restriction by registering permitted ID numbers
- Reception rejection by registering reject FAX numbers

Full Mode

This machine supports full-mode Internet faxing that conforms to the ITU-T T.37 recommendations. If the other party’s machine also supports full mode, you can use transmission confirmation when you send a fax to check that it successfully reached the recipient’s machine.

When this machine receives an i-FAX

The machine sends reception capacity information in response to a transmission confirmation request from the sender. Information on the resolutions, compression modes and paper sizes supported by this machine is sent to the sender.

When this machine sends an i-FAX

The machine sends a transmission confirmation to recipients who selected full mode. Transmission confirmation results sent back by recipients are included in the sent fax report.

For more information on sent fax reports, refer to the following:

➤ Printing Activity Reports (page 7-10)

For more information on setting the conditions for destination machines, refer to the following:

➤ Registering a contact address (i-FAX) (page 2-18)

i-FAX transmission procedure (page 10-10)
i-FAX Settings

To send and receive Internet faxes, you must first specify the SMTP server and POP3 server settings. Specify these settings using Command Center RX on a computer that is connected to this machine via a network. Refer to the machine’s Operation Guide for information on the network settings.

Accessing Command Center RX

1 Display the screen.
   1 Launch your Web browser.
   2 In the address or location bar, enter the machine’s IP address or the host name.
      Examples: 10.180.81.3/ (for IP address)
                 MFP001 (if the host name is "MFP001")

   The web page displays basic information about the machine and Command Center RX as well as their current status.

   NOTE
   If the screen "There is a problem with this website's security certificate." is displayed, configure the certificate.

   ➤ Command Center RX User Guide
   You can also continue the operation without configuring the certificate.

3 Enter the user name and password of the administrator, and click Login.
   Setting Administrator User Name, and Password restricts general users' access to pages other than the Start page. For security purposes, setting the Administrator password is highly recommended. The default Administrator password is factory-set as ‘Admin’.

4 Click ‘Function Settings’ from the navigation bar on the left to view and set values for that particular category.

5 Click ‘FAX / i-FAX’.
   The Transmit Settings dialog box will appear.

   ➤ Command Center RX User Guide
## i-FAX Default Settings

**Function Settings > FAX / i-FAX**

Use this page to enable the internet faxing.

The settings available on the page are shown below.

## i-FAX Settings

**TX/RX**  
Display whether an i-FAX connection is available or not. Configure i-FAX in [i-FAX (SMTP & POP3)] on the Protocol Settings page.

### SMTP

**SMTP Server Name**  
Enter the SMTP server name or SMTP server IP address. You can enter up to 64 characters. If you enter the server name, you must specify the IP address of the DNS server. You can enter the DNS server IP address in the TCP/IP settings screen.

**SMTP Port Number**  
Set the port number used by SMTP. Normally, 25 is used.

**SMTP Server Timeout**  
Enter the timeout period in seconds.

**Authentication Protocol**  
Specify whether SMTP authentication will be used or whether [POP before SMTP] will be used.

**POP before SMTP Timeout**  
If you selected [POP before SMTP] in the authentication setting, specify the timeout period in seconds.

**Connection Test**  
Tests to confirm that the settings on this page are correct. When the [Test] button is clicked, this machine tries to connect to the SMTP server.

**Domain Restriction**  
Activate or deactivate to restrict domains. Click the [Domain List] button to configure. Enter a domain name that is permitted or rejected. You can also specify the E-mail addresses.

i-FAX transmission procedure

The basic procedure for using the fax system is explained below.

1 Select [Send] key on the Home screen.

2 Place the originals.

3 Specifying destination.

1 For placing originals, refer to the following:
   Machine’s Operation Guide

NOTE
The illustration varies between models.

Dialing methods without using the numeric keys

Choosing from the Address Book (page 3-9)
Choosing from the One Touch Key (page 3-11)
Choosing from the Speed Dial (page 3-11)
Using redial (page 3-3)

NOTE
When On is selected in Entry Check for New Dest., a confirmation screen is displayed for the entered FAX number. Re-enter the same FAX number and select [OK].

Character Entry Method (page 12-2)

For a Direct SMTP address, which does not go through a server, specify only the IP address of the other machine, or specify any name using half-width alphanumeric characters in the format "name@[IP address of other machine]".

Example: officeA@192.168.48.21

When [Add to Addr Book] is displayed, you can register entered contents to the Address Book.

In addition to an i-fax, you can include FAX transmission, e-mail transmission and folder (SMB/FTP) transmission to send as one job.

When the destination includes FAX or i-FAX, the FAX or i-FAX jobs are sent in monochrome and the other sending jobs are sent as the same color as the scanned originals.
4 Configure the detailed settings.

1 "Mode" [ ] > [Simple] or [Full]

2 "Via Server" [ ] > [On] or [Off].
   When this setting is set to [Off], transmission takes place by direct SMTP (not through an e-mail server).
   When this setting is set to [On], transmission takes place by the i-FAX method (through an e-mail server).

NOTE
The settings are automatically configured based on the i-FAX transmission type that is set in Command Center RX. When the transmission type is set to [Specify for Each Destination], these settings can be configured.

5 Specifying the Destinations Conditions.
Select [Destination Condition].
The available settings are shown below.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Resolution</td>
<td>Specify the resolutions that can be received by the destination fax machine. If you try to send an i-FAX using a prohibited resolution, it is automatically changed to a permitted resolution and then sent. • 200 × 100 dpi: Permitted (fixed) • 200 × 200 dpi: Permitted (fixed) • 200 × 400 dpi: Permitted or prohibited • 400 × 400 dpi: Permitted or prohibited • 600 × 600 dpi: Permitted or prohibited To permit a resolution setting, press the key for that resolution so that it is highlighted. To prohibit a resolution, press the key again so that it is no longer highlighted.</td>
</tr>
<tr>
<td>Compression</td>
<td>Select a suitable file format for the destination fax machine. MH, MR, MMR or JBIG</td>
</tr>
<tr>
<td>Paper Size</td>
<td>Display the sending paper size for the destination fax machine. If you try to send an i-FAX using a prohibited paper size, it is automatically changed to a permitted paper size and then sent. • A4/Letter: Permitted (fixed) • B4: Permitted or prohibited • A3/Ledger: Permitted or prohibited</td>
</tr>
</tbody>
</table>

6 Selecting the functions.
► Fax transmission functions (page 3-18)
Grayed out items cannot be set.

7 Press the [Start] key.
When scanning finishes, transmission starts.
Checking the Send Status

1. Select the [Status/Job Cancel] key.

2. Display the send job status screen.
   Select [Sending Jobs].
   The list of accepted time, destination, and status are displayed for each job.
i-FAX Reception

At set intervals, this machine connects to the mail server and automatically downloads and prints any Internet faxes found on the server. No particular user intervention is needed when the machine receives an i-FAX.

**NOTE**
When Direct SMTP reception (communication without a mail server) is used, your machine connects directly to the sending machine instead of connecting to an external mail server. Because your machine connects directly to the other machine, reception takes place immediately without the need to execute manual reception, which is an operation that queries the server.

You can change the following reception settings:

- POP3 (page 10-8)
  - i-FAX address registration
  - Incoming E-mail check interval setting
  - Cover page (E-mail information) printing

**Manual i-FAX Reception**

Use this procedure to check for faxes immediately.

1. **Display the screen.**
   - [Status/Job Cancel] key > [Device/Communicate]

2. **Receive an i-FAX.**
   - Select "i-FAX" [Check New FAX].
   - The machine connects to the mail server and starts downloading any Internet faxes it finds.
This chapter explains the following topics:

- Indicators During Sending/Receiving Operation ................................................................. 11-2
- Responding to an Attention Indicator Flashes ........................................................................ 11-2
- Precautions When Turning Power OFF ................................................................................ 11-3
- Messages ............................................................................................................................. 11-4
- Error Code List .................................................................................................................. 11-6
- Troubleshooting .................................................................................................................. 11-10
- Common inquiries .............................................................................................................. 11-12
Indicators During Sending/Receiving Operation

The [Processing] and [Memory] indicators show the fax transmission status.

- The [Processing] indicator blinks during fax transmission and reception.
- The [Memory] indicator blinks when source data is being stored in memory for memory transmission.
- The [Memory] indicator is lit when there is source data stored in the memory for delayed transmission.

Responding to an Attention Indicator Flashes

If the [Attention] indicator flashes, select the [Status/Job Cancel] key to check an error message. If the message is not indicated on the touch panel when the [Status/Job Cancel] key is pressed or the attention indicator flashes, check the following.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Checkpoints</th>

<td>—</td>
</tr>
</tbody>
</table>
Precautions When Turning Power OFF

To power off the machine, press the Power switch. You cannot automatically receive a fax when the power switch is turned off.

1 Turn the power switch off.

- TASKalfa 2552ci/TASKalfa 3252ci/TASKalfa 3011i/TASKalfa 3511i
- TASKalfa 4002i/TASKalfa 4052ci/TASKalfa 5002i/TASKalfa 5052ci/TASKalfa 6002i/TASKalfa 6052ci
- TASKalfa 3011i/TASKalfa 3511i

The confirmation message for power supply off is displayed.

It takes about 3 minutes for power off.
Messages

When an error occurs, the display may show one of the messages listed below. These will help you identify and correct the problem.

NOTE
When a transmission error occurs, a sent/receipt result report is produced.

Check the error code shown in the report and refer to the following:

- Error Code List (page 11-6)

To print the sent/receipt result report, refer to the following:

- Send Result Reports (page 7-7)
- FAX RX Result Reports (page 7-9)

You may also check error codes using the activity report.

- Activity Report (Outgoing FAX Report and Incoming FAX Report) (page 7-10)

# Error Code List

When a transmission error occurs, one of the following error codes is recorded in the TX/RX Result Report and Activity Report.

**NOTE**

"U" or "E" will appear in the error code depending on the communication speed setting.

<table>
<thead>
<tr>
<th>Error Code</th>
<th>Possible Cause/Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Busy</td>
<td>Failed to establish connection with the recipient despite auto redialing the preset number of times. Send again.</td>
</tr>
<tr>
<td>CANCELED</td>
<td>Transmission was canceled due to an action to cancel transmission. Reception was canceled due to an action to cancel reception.</td>
</tr>
<tr>
<td>E00300</td>
<td>Paper depletion occurred at the recipient machine. Check with the recipient.</td>
</tr>
<tr>
<td>E00430 - E00462</td>
<td>Reception was canceled because of mismatching of communication features with the sender machine although the line connection was established.</td>
</tr>
<tr>
<td>E00601 - E00690</td>
<td>Communication was stopped due to the machine failure. Send or receive again.</td>
</tr>
<tr>
<td>E00700</td>
<td>Communication was stopped due to failure on the part of the sender or recipient machine.</td>
</tr>
<tr>
<td>E00800 - E00811</td>
<td>Page(s) not sent correctly. Send again. If you still have trouble, reduce TX Start Speed and send again.</td>
</tr>
<tr>
<td>E00900 - E00910</td>
<td>Page(s) not received correctly. Ask the sender to resend.</td>
</tr>
<tr>
<td>E01000 - E01097</td>
<td>Communication error occurred during transmission. Send again. If you still have trouble, reduce TX Start Speed and send again.</td>
</tr>
<tr>
<td>E01100 - E01196</td>
<td>Communication error occurred during reception. Ask the sender to resend.</td>
</tr>
<tr>
<td>U01400</td>
<td>Failed to establish communication with the sender or recipient machine because dialing registered for a tone line system was used in a pulse line system.</td>
</tr>
<tr>
<td>E01500</td>
<td>Communication error occurred during high-speed transmission. Send again. If you still have trouble, reduce TX Start Speed and send again.</td>
</tr>
</tbody>
</table>

**NOTE**

If the communication error occurs frequently, change the default setting of TX Start Speed in System Menu.
<table>
<thead>

Received FAX Sizes and Paper Priority (Inch Model) ....................................................... 12-17
Appendix > Character Entry Method

Character Entry Method

To enter characters for a name, use the on-display keyboard in the touch panel following the steps as explained below.

**NOTE**

Keyboard Layout

"QWERTY", "QWERTZ" and "AZERTY" are available as keyboard layouts the same as a PC keyboard. Select the [System Menu/Counter] key, [Common Settings] and then [Keyboard Layout] to choose the desired layout. "QWERTY" layout is used here as an example. You may use another layout following the same steps.

Entry Screens

### Entering Characters

Follow the steps below to enter 'List A-1' for an example.

1. Select [Upper-case].
2. Select [L]. The letter "L" is shown on the display.
3. Select [Lower-case].
4. Select [l], [s], [t] and [Space].
5. Select [Upper-case].
6. Select [A].
7. Select [No./Symbol].
8. Select [\_] or [\_\_\_] repeatedly to view the keyboard containing [\-] and [1].
9. Select [-] and [1].
10. Check that the entry is correct. Press [OK].

*5 This function is not displayed for TASKalfa 3011i/TASKalfa 3511i.
**Received FAX Sizes and Paper Priority (Metric Model)**

When no paper loaded in the cassettes matches the received fax size and orientation, the machine automatically chooses the printing paper according to the following priority.

**Same Size Override**

If [Off] is set for Reduced RX Size, the printing paper is chosen by prioritizing the same size override.

*> Reduced RX Size (page 4-7)*

*2 Folio Long Originals: Originals longer than Folio in the direction of the paper feed.
*3 B4 Long Originals: Originals longer than B4 in the direction of the paper feed.
*4 A3 Long Originals: Originals longer than A3 in the direction of the paper feed.
*5 Paper orientation is different from the received document. The image is printed after being rotated 90° automatically.
*6 The document is printed on this paper when the length of the document received is 351 to 380.4 mm and the cassette set as the Folio size is empty.
*7 The document is printed on this paper when the length of the document received is short.

![NOTE]
When a paper type is selected in [Media Type], a received fax is printed using the matching paper source.

Media Type for Print Output (page 4-6)
Even if [Media Type] is selected, a received fax cannot be printed when the paper type loaded in the paper source is not suitable for fax printouts.
### Reduced RX Sizes

If [On] is set for Reduced RX Size, the printing paper is chosen by prioritizing to reduce the paper size and print data on single paper.

*Reduced RX Size (page 4-7)*

*Originals*: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13
*1 A4 Long Originals: Originals longer than A4 in the direction of the paper feed.
*2 Folio Long Originals: Originals longer than Folio in the direction of the paper feed.
*3 B4 Long Originals: Originals longer than B4 in the direction of the paper feed.
*4 A3 Long Originals: Originals longer than A3 in the direction of the paper feed.
*5 Paper orientation is different from the received document. The image is printed after being rotated 90° automatically.
*6 The data received is reduced to fit the paper size and then printed.
*7 The document is printed on this paper when the length of the document received is 351 to 380.4 mm and the cassette set as the Folio size is empty.

邮轮 indicates print output on two sheets.

NOTE
When a paper type is selected in [Media Type], a received fax is printed using the matching paper source.

Media Type for Print Output (page 4-6)

Even if [Media Type] is selected, a received fax cannot be printed when the paper type loaded in the paper source is not suitable for fax printouts.
# Received FAX Sizes and Paper Priority (Inch Model)

When no paper loaded in the cassettes matches the received fax size and orientation, the machine automatically chooses the printing paper according to the following priority.

## Same Size Override

If [Off] is set for Reduced RX Size, the printing paper is chosen by prioritizing the same size override.

> **Reduced RX Size (page 4-7)**
